

Bats Global Markets to Provide Email Invoice Distribution Functionality

Overview

Bats Global Markets is pleased to announce the introduction of opt-in email invoice distribution functionality, available for the September invoice cycle distributed in early October. This enhancement has been driven by customer feedback, with the goal being to increase efficiency and assist in the facilitation of the invoice retrieval process.

Currently, Bats invoices are provided via the Bats Member Web Portal. Invoices will continue to be available on the Portal providing firms the option to download invoices, as well as the opportunity to view their complete invoice history. Additionally, invoices will be sent via email to authorized contacts who are "opted-in" to this new feature. Invoices for prior months will not be sent via email but will continue to be available on the Portal. Bats recommends that all firms who choose to "opt-in" ensure their incoming email servers are configured to support TLS encryption, to provide an additional layer of security during the transport process.

Opt-in Capability

Firm Administrators will be able to leverage the [Request Portal Account](#) tool in the [Bats Member Web Portal](#) to input their Billing Contact User's information and select the new privilege.

In the "Member Tools" section, the privilege of "Request Invoices via Email" has been made available to opt-in to this new feature. Please note that by default, firms will not be entitled to receive their invoices via email.

More Information

Please contact the [Bats Trade Desk](#) or your [Director of Sales](#) at 866.472.5267 for any additional information regarding this change.

We appreciate your continued support of Bats and look forward to earning more of your business.
