

Cboe Large in Scale (Cboe LIS) is an indication of interest (IOI) negotiation and execution platform allowing market participants to trade large blocks of European equities without revealing their IOI to the wider market.

## Pan-European Block Trading Platform

MIFID II buy-side demand has led to more innovation of block trading platforms. In turn, this has led to higher volumes that has helped the buy-side find natural contras.

Cboe LIS is the fastest-growing block venue in Europe with trading available in more than 6,000 symbols across 17 major European markets including equities, depository receipts and ETFs.

## Get Connected

This service is powered by proven software used by the BIDS ATS, combined with the Cboe Europe exchange infrastructure required for trade execution, clearing and settlement. Cboe LIS is fully compliant with MiFID II regulations.

The BIDS Trader interface is seamlessly integrated into buy-side order management systems (OMS), with Cboe sell-side participants also able to enter IOIs through FIX connections.

IOIs submitted to the Cboe LIS system to identify potential matches

Platform interacts with buy-side and sell-side to firm up the IOI

A Designated Broker is selected by the buy-side trader to execute the transaction

Trade is executed on-exchange through the Recognised Investment Exchange (RIE)

Trade is sent to clear under Cboe interoperable model and reported to the Designated Broker via a drop copy

Trade is reported through the Cboe CXE market data feed as an off-book, on-exchange trade in real time

## Buy-Side Dealer Tools

Cboe LIS allows buy-side traders to maintain control over their IOI via the BIDS Trader software, which reads from their OMS/EMS.

- Filtering and scorecards assist in protecting IOI interaction
- Flexibility to select Designated Brokers based on existing relationships
- Directional information is not published and users are never aware of the identity of their counterparty
- No information about IOIs is exposed unless there is a bona fide opportunity to trade
- Minimum size requirements based on the ESMA large in scale table

### Customer Coverage

Access open to buy-side firms via their OMS/EMS while still maintaining sell-side broker relationships.

### Hours and Holidays
