**Subject: Teucrium Wheat Fund
 Teucrium Soybean Fund
 Teucrium Sugar Fund**

Background Information on the Fund

The Teucrium Commodity Trust (the "Trust") is a Delaware statutory trust organized on September 11, 2009. The Trust consists of several series of funds (each, a "Fund" and collectively, the "Funds"). The Funds are not mutual funds registered under the Investment Company Act of 1940 and are not subject to regulation under such Act. The Funds were formed and are managed and controlled by the Sponsor, Teucrium Trading, LLC (the "Sponsor"). The Sponsor is a limited liability company formed in Delaware on July 28, 2009 that is registered as a commodity pool operator ("CPO") with the Commodity Futures Trading Commission ("CFTC") and is a member of the National Futures Association ("NFA").

Teucrium Wheat Fund

The investment objective of the Teucrium Wheat Fund is to have the daily changes in percentage terms of the Shares' net asset value ("NAV") reflect the daily changes in percentage terms of a weighted average of the closing settlement prices for three futures contracts for wheat (wheat futures contracts generally referred to herein as "Wheat Futures Contracts") that are traded on the Chicago Board of Trade ("CBOT"), specifically: (1) the second-to-expire CBOT Wheat Futures Contract, weighted 35%, (2) the third-to-expire CBOT Wheat Futures Contract, weighted 30%, and (3) the CBOT Wheat Futures Contract expiring in the December following the expiration month of the third-to-expire contract, weighted 35%. (This weighted average of the three referenced Wheat Futures Contracts is referred to herein as the "Wheat Benchmark," and the three Wheat Futures Contracts that at any given time make up the Wheat Benchmark are referred to herein as the "Wheat Benchmark Component Futures Contracts").

The Fund seeks to achieve its investment objective by investing under normal market conditions in Wheat Benchmark Component Futures Contracts or, in certain circumstances, in other Wheat Futures Contracts traded on the CBOT, the Kansas City Board of Trade ("KCBT"), or the Minneapolis Grain Exchange ("MGEX"), or Wheat Futures Contracts traded on foreign exchanges. In addition, and to a limited extent, the Fund also may invest in exchange-traded options on Wheat Futures Contracts, and in wheat-based swap agreements that are cleared through the CBOT or its affiliated provider of clearing services ("Cleared Wheat Swaps") in furtherance of the Fund's investment objective.

Specifically, once position limits in CBOT Wheat Futures Contracts are reached, the Fund's intention is to invest first in Cleared Wheat Swaps to the extent permitted under the position

limits applicable to Cleared Wheat Swaps and appropriate in light of the liquidity in the Cleared Wheat Swaps market, and then, using its commercially reasonable judgment, in other Wheat Futures Contracts (i.e., Wheat Futures Contracts traded on KCBT, MGEX or traded on foreign exchanges) or instruments such as cash-settled options on Wheat Futures Contracts and forward contracts, swaps other than Cleared Wheat Swaps, and other over-the-counter transactions that are based on the price of wheat and Wheat Futures Contracts (collectively, "Other Wheat Interests," and together with Wheat Futures Contracts and Cleared Wheat Swaps, "Wheat Interests"). By utilizing certain or all of these investments, the Sponsor will endeavor to cause the Fund's performance to closely track that of the Wheat Benchmark. The circumstances under which such investments in Other Wheat Interests may be utilized (e.g., imposition of position limits) are discussed below.

According to the Registration Statement, the Fund seeks to achieve its investment objective primarily by investing in Wheat Interests such that daily changes in the Fund's NAV will be expected to closely track the changes in the Wheat Benchmark. The Fund's positions in Wheat Interests will be changed or "rolled" on a regular basis in order to track the changing nature of the Wheat Benchmark.

Consistent with achieving the Fund's investment objective of closely tracking the Wheat Benchmark, the Sponsor may for certain reasons cause the Fund to enter into or hold Cleared Wheat Swaps and/or Other Wheat Interests. For example, certain Cleared Wheat Swaps have standardized terms similar to, and are priced by reference to, a corresponding Wheat Benchmark Component Futures Contract. Additionally, Other Wheat Interests that do not have standardized terms and are not exchange-traded ("over-the-counter" Wheat Interests), can generally be structured as the parties desire. Therefore, the Fund might enter into multiple Cleared Wheat Swaps and/or over-the-counter Wheat Interests intended to exactly replicate the performance of each of the three Wheat Benchmark Component Futures Contracts, or a single over-the-counter Wheat Interest designed to replicate the performance of the Wheat Benchmark as a whole. According to the Registration Statement, assuming that there is no default by a counterparty to an over-the-counter Wheat Interest, the performance of the over-the-counter Wheat Interest will necessarily correlate exactly with the performance of the Wheat Benchmark or the applicable Wheat Benchmark Component Futures Contract. The Fund might also enter into or hold over-the-counter Wheat Interests to facilitate effective trading, consistent with the discussion of the Fund's "roll" strategy in the preceding paragraph. In addition, the Fund might enter into or hold over-the-counter Wheat Interests that would be expected to alleviate overall deviation between the Fund's performance and that of the Wheat Benchmark that may result from certain market and trading inefficiencies or other reasons.

The Fund will invest in Wheat Interests to the fullest extent possible without being leveraged or unable to satisfy its expected current or potential margin or collateral obligations with respect to its investments in Wheat Interests. After fulfilling such margin and collateral requirements, the Fund will invest the remainder of its proceeds from the sale of baskets in obligations of the United States government ("Treasury Securities") or cash equivalents, and/or hold such assets in cash (generally in interest-bearing accounts). Therefore, the focus of the Sponsor in managing the Fund is investing in Wheat Interests and in Treasury Securities, cash and/or cash equivalents. Each of the Funds will earn interest income from the Treasury Securities and/or cash equivalents that it purchases and on the cash it holds through each Fund's custodian, the Bank of New York Mellon (the "Custodian" and the "Administrator").

The Sponsor endeavors to place the Fund's trades in Wheat Interests and otherwise manage the Fund's investments so that the Fund's average daily tracking error against the Wheat Benchmark will be less than 10 percent over any period of 30 trading days.

The Sponsor does not intend to operate the Fund in a fashion such that its per Share NAV will equal, in dollar terms, the spot price of a bushel or other unit of wheat or the price of any particular Wheat Futures Contract.

The CFTC and U.S. designated contract markets such as the CBOT may establish position limits on the maximum net long or net short futures contracts in commodity interests that any person or group of persons under common trading control (other than as a hedge) may hold, own or control.

In addition to position limits, the exchanges may establish daily price fluctuation limits on futures contracts. The daily price fluctuation limit establishes the maximum amount that the price of futures contracts may vary either up or down from the previous day's settlement price. Once the daily price fluctuation limit has been reached in a particular futures contract, no trades may be made at a price beyond that limit. Position limits, accountability levels, and daily price fluctuation limits set by the exchanges have the potential to cause tracking error, which could cause the price of Shares to substantially vary from the Wheat Benchmark and prevent an investor from being able to effectively use the Fund as a way to hedge against wheat-related losses or as a way to indirectly invest in wheat.

The Fund does not intend to limit the size of the offering and will attempt to expose substantially all of its proceeds to the wheat market utilizing Wheat Interests. If the Fund encounters position limits, accountability levels, or price fluctuation limits for Wheat Futures Contracts and/or Cleared Wheat Swaps on the CBOT, it may then, if permitted under applicable regulatory requirements, purchase Other Wheat Interests and/or Wheat Futures Contracts listed on other domestic or foreign exchanges. However, the Wheat Futures Contracts available on such foreign exchanges may have different underlying sizes, deliveries, and prices. In addition, the Wheat Futures Contracts available on these exchanges may be subject to their own position limits and accountability levels. In any case, notwithstanding the potential availability of these instruments in certain circumstances, position limits could force the Fund to limit the number of Creation Baskets (as defined below) that it sells.

Teucrium Soybean Fund

According to the Registration Statement, the investment objective of the Fund is to have the daily changes in percentage terms of the Shares' NAV reflect the daily changes in percentage terms of a weighted average of the closing settlement prices for three futures contracts for soybeans (soybean futures contracts generally referred to herein as "Soybean Futures Contracts") that are traded on the CBOT. Except as described in the following paragraph, the three Soybean Futures Contracts will be: (1) second-to-expire CBOT Soybean Futures Contract, weighted 35%, (2) the third-to-expire CBOT Soybean Futures Contract, weighted 30%, and (3) the CBOT Soybean Futures Contract expiring in the November following the expiration month of the third-to-expire contract, weighted 35%. The weighted average of the three Soybean Futures Contracts is referred to herein as the "Soybean Benchmark," and the three Soybean Futures Contracts that at any given time make up the Soybean Benchmark are referred to herein as the "Soybean Benchmark Component Futures Contracts." The circumstances under which such investments in Other Soybean Interests may be utilized (e.g., imposition of position limits) are discussed below.

Soybean Futures Contracts traded on the CBOT expire on a specified day in seven different months: January, March, May, July, August, September and November. However, there is generally a less liquid market for the Soybean Futures Contracts expiring in August (the "August Contract") and September (the "September Contract" and, together with the August Contract, the "Excluded Contracts"), and the Sponsor has determined not to incorporate the Excluded Contracts into the Soybean Benchmark calculation. Accordingly, during the period when the Excluded Contracts are the second-to-expire and third-to-expire Soybean Futures Contract, the fourth-to-expire and fifth-to-expire Soybean Futures Contracts will take the place of the second-to-expire and third-to-expire Soybean Futures Contracts, respectively, as Soybean Benchmark Component Futures Contracts. Similarly, when the August Contract is the third-to-expire Soybean Futures Contract, the fifth-to-expire Soybean Futures Contract will take the place of the August Contract as a Soybean Benchmark Component Futures Contract, and when the September Contract is the second-to-expire Soybean Futures Contract, the third-to-expire and fourth-to-expire Soybean Futures Contracts will be Soybean Benchmark Component Futures Contracts.

According to the Registration Statement, the Fund seeks to achieve its investment objective by investing under normal market conditions in Soybean Benchmark Component Futures Contracts or, in certain circumstances, in other Soybean Futures Contracts traded on CBOT or Soybean Futures Contracts traded on foreign exchanges. In addition, and to a limited extent, the Fund also may invest in exchange-traded options on Soybean Futures Contracts and in soybean-based swap agreements that are cleared through the CBOT or its affiliated provider of clearing services ("Cleared Soybean Swaps") in furtherance of the Fund's investment objective.

Specifically, once CBOT position limits in Soybean Futures Contracts are reached, the Fund's intention is to invest first in Cleared Soybean Swaps to the extent permitted under the CBOT position limits applicable to Cleared Soybean Swaps and appropriate in light of the liquidity in the Cleared Soybean Swaps market, and then, using its commercially reasonable judgment, in other Soybean Futures Contracts (i.e., Soybean Futures Contracts traded on foreign exchanges) and instruments such as cash-settled options on Soybean Futures Contracts and forward contracts, swaps other than Cleared Soybean Swaps, and other over-the-counter transactions that are based on the price of soybeans and Soybean Futures Contracts (collectively, "Other Soybean Interests," and together with Soybean Futures Contracts and Cleared Soybean Swaps, "Soybean Interests").

The Fund seeks to achieve its investment objective primarily by investing in Soybean Interests such that daily changes in the Fund's NAV will be expected to closely track the changes in the Soybean Benchmark. The Fund's positions in Soybean Interests will be changed or "rolled" on a regular basis in order to track the changing nature of the Soybean Benchmark. For example, five times a year (on the date on which certain Soybean Futures Contracts expire), a particular Soybean Futures Contract will no longer be a Soybean Benchmark Component Futures Contract, and the Fund's investments will have to be changed accordingly.

According to the Registration Statement, consistent with achieving the Fund's investment objective of closely tracking the Soybean Benchmark, the Sponsor may for certain reasons cause the Fund to enter into or hold Cleared Soybean Swaps and/or Other Soybean Interests. For example, certain Cleared Soybean Swaps have standardized terms similar to, and are priced by reference to, a corresponding Soybean Benchmark Component Futures Contract. Additionally, Other Soybean Interests that do not have standardized terms and are not exchange-traded ("over-the-counter" Soybean Interests) can generally be structured as the

parties desire. Therefore, the Fund might enter into multiple Cleared Soybean Swaps and/or over-the-counter Soybean Interests intended to exactly replicate the performance of each of the three Soybean Benchmark Component Futures Contracts, or a single over-the-counter Soybean Interest designed to replicate the performance of the Soybean Benchmark as a whole.

According to the Registration Statement, assuming that there is no default by a counterparty to an over-the-counter Soybean Interest, the performance of the over-the-counter Soybean Interest will necessarily correlate exactly with the performance of the Soybean Benchmark or the applicable Soybean Benchmark Component Futures Contract. The Fund might also enter into or hold over-the-counter Soybean Interests to facilitate effective trading, consistent with the discussion of the Fund's "roll" strategy in the preceding paragraph. In addition, the Fund might enter into or hold over-the-counter Soybean Interests that would be expected to alleviate overall deviation between the Fund's performance and that of the Soybean Benchmark that may result from certain market and trading inefficiencies or other reasons.

The Fund will invest in Soybean Interests to the fullest extent possible without being leveraged or unable to satisfy its expected current or potential margin or collateral obligations with respect to its investments in Soybean Interests. After fulfilling such margin and collateral requirements, the Fund will invest the remainder of its proceeds from the sale of baskets in Treasury Securities or cash equivalents, and/or hold such assets in cash (generally in interest-bearing accounts). Therefore, the focus of the Sponsor in managing the Fund is investing in Soybean Interests and in Treasury Securities, cash and/or cash equivalents.

The Sponsor endeavors to place the Fund's trades in Soybean Interests and otherwise manage the Fund's investments so that the Fund's average daily tracking error against the Soybean Benchmark will be less than 10 percent over any period of 30 trading days.

The Sponsor does not intend to operate the Fund in a fashion such that its per Share NAV will equal, in dollar terms, the spot price of a bushel or other unit of soybean or the price of any particular Soybean Futures Contract.

The CFTC's position limits for Soybean Futures Contracts (including related options) are 600 spot month contracts, 6,500 contracts expiring in any other single month, and 10,000 contracts for all months. Position limits could in certain circumstances effectively limit the number of Creation Baskets that the Fund can sell but, because the Fund is new, it is not expected to reach asset levels that would cause these position limits to be implicated in the near future. Cleared Soybean Swaps are subject to position limits that are substantially identical to, but measured separately from, the positions limits applicable to Soybean Futures Contracts. In light of the position limits discussed above, the CBOT has not set any accountability levels for Soybean Futures Contracts.

According to the Registration Statement, the CBOT imposes a \$0.70 per bushel (\$3,500 per contract) daily price fluctuation limit for Soybean Futures Contracts. Once the daily price fluctuation limit has been reached in a particular Soybean Futures Contract, no trades may be made at a price beyond that limit. If two or more Soybean Futures Contract months within the first seven listed non-spot contracts close at the limit, the daily price limit increases to \$1.05 per bushel (\$5,250 per contract) the next business day and to \$1.60 per bushel (\$8,000 per contract) the next business day. These limits are based off the previous trading day's settlement price. Position limits and daily price fluctuation limits set by the CFTC and the exchanges have the potential to cause tracking error, which could cause the price of Shares to substantially vary from the Soybean Benchmark and prevent an investor from being able to effectively use the

Fund as a way to hedge against soybean-related losses or as a way to indirectly invest in soybeans.

The Fund does not intend to limit the size of the offering and will attempt to expose substantially all of its proceeds to the soybean market utilizing Soybean Interests. If the Fund encounters position limits or price fluctuation limits for Soybean Futures Contracts and/or Cleared Soybean Swaps on the CBOT, it may then, if permitted under applicable regulatory requirements, purchase Other Soybean Interests and/or Soybean Futures Contracts listed on foreign exchanges. However, the Soybean Futures Contracts available on such foreign exchanges may have different underlying sizes, deliveries, and prices. In addition, the Soybean Futures Contracts available on these exchanges may be subject to their own position limits or similar restrictions. In any case, notwithstanding the potential availability of these instruments in certain circumstances, position limits could force the Fund to limit the number of Creation Baskets (as defined below) that it sells.

Teucrium Sugar Fund

According to the Registration Statement, the investment objective of the Fund is to have the daily changes in percentage terms of the Shares' NAV reflect the daily changes in percentage terms of a weighted average of the closing settlement prices for three futures contracts for sugar (sugar futures contracts generally referred to herein as "Sugar Futures Contracts") that are traded on ICE Futures US ("ICE Futures"), specifically: (1) the second-to-expire Sugar No. 11 Futures Contract (a "Sugar No. 11 Futures Contract"), weighted 35%, (2) the third-to-expire Sugar No. 11 Futures Contract, weighted 30%, and (3) the Sugar No. 11 Futures Contract expiring in the March following the expiration month of the third-to-expire contract, weighted 35%. The weighted average of the three Sugar No. 11 Futures Contracts is referred to herein as the "Sugar Benchmark," and the three Sugar No. 11 Futures Contracts that at any given time make up the Sugar Benchmark are referred to herein as the "Sugar Benchmark Component Futures Contracts."

The Fund seeks to achieve its investment objective by investing under normal market conditions in Sugar Benchmark Component Futures Contracts or, in certain circumstances, in other Sugar Futures Contracts traded on ICE Futures or the New York Mercantile Exchange ("NYMEX"), or Sugar Futures Contracts traded on foreign exchanges. In addition, and to a limited extent, the Fund also may invest in exchange-traded options on Sugar Futures Contracts and in sugar-based swap agreements that are cleared through ICE Futures or its affiliated provider of clearing services ("Cleared Sugar Swaps") in furtherance of the Fund's investment objective.

Specifically, once accountability levels in Sugar No. 11 Futures Contracts traded on ICE Futures are reached, the Fund's intention is to invest first in Cleared Sugar Swaps to the extent permitted under the accountability levels applicable to Cleared Sugar Swaps and appropriate in light of the liquidity in the Cleared Sugar Swaps market, and then, using its commercially reasonable judgment, in other Sugar Futures Contracts (i.e., Sugar Futures Contracts traded on the NYMEX or foreign exchanges) and instruments such as cash-settled options on Sugar Futures Contracts and forward contracts, swaps other than Cleared Sugar Swaps, and other over-the-counter transactions that are based on the price of sugar and Sugar Futures Contracts (collectively, "Other Sugar Interests," and together with Sugar Futures Contracts and Cleared Sugar Swaps, "Sugar Interests").

The Fund seeks to achieve its investment objective primarily by investing in Sugar Interests such that daily changes in the Fund's NAV will be expected to closely track the changes in the

Sugar Benchmark. The Fund's positions in Sugar Interests will be changed or "rolled" on a regular basis in order to track the changing nature of the Sugar Benchmark. For example, four times a year (on the date on which a Sugar No. 11 Futures Contract expires), a particular Sugar No. 11 Futures Contract will no longer be a Sugar Benchmark Component Futures Contract, and the Fund's investments will have to be changed accordingly.

Consistent with achieving the Fund's investment objective of closely tracking the Sugar Benchmark, the Sponsor may for certain reasons cause the Fund to enter into or hold Cleared Sugar Swaps and/or Other Sugar Interests. For example, certain Cleared Sugar Swaps have standardized terms similar to, and are priced by reference to, a corresponding Sugar Benchmark Component Futures Contract. Additionally, Other Sugar Interests that do not have standardized terms and are not exchange-traded, referred to as "over-the-counter" Sugar Interests, can generally be structured as the parties desire. Therefore, the Fund might enter into multiple Cleared Sugar Swaps and/or over-the-counter Sugar Interests intended to exactly replicate the performance of each of the three Sugar Benchmark Component Futures Contracts, or a single over-the-counter Sugar Interest designed to replicate the performance of the Sugar Benchmark as a whole.

According to the Registration Statement, assuming that there is no default by a counterparty to an over-the-counter Sugar Interest, the performance of the over-the-counter Sugar Interest will necessarily correlate exactly with the performance of the Sugar Benchmark or the applicable Sugar Benchmark Component Futures Contract. The Fund might also enter into or hold over-the-counter Sugar Interests other than Sugar Benchmark Component Futures Contracts to facilitate effective trading, consistent with the discussion of the Fund's "roll" strategy in the preceding paragraph. In addition, the Fund might enter into or hold over-the-counter Sugar Interests that would be expected to alleviate overall deviation between the Fund's performance and that of the Sugar Benchmark that may result from certain market and trading inefficiencies or other reasons.

The Fund will invest in Sugar Interests to the fullest extent possible without being leveraged or unable to satisfy its expected current or potential margin or collateral obligations with respect to its investments in Sugar Interests. After fulfilling such margin and collateral requirements, the Fund will invest the remainder of its proceeds from the sale of baskets in Treasury Securities or cash equivalents, and/or hold such assets in cash (generally in interest-bearing accounts). Therefore, the focus of the Sponsor in managing the Fund is investing in Sugar Interests and in Treasury Securities, cash and/or cash equivalents.

The Sponsor endeavors to place the Fund's trades in Sugar Interests and otherwise manage the Fund's investments so that the Fund's average daily tracking error against the Sugar Benchmark will be less than 10 percent over any period of 30 trading days.

The Sponsor does not intend to operate the Fund in a fashion such that its per Share NAV will equal, in dollar terms, the spot price of a pound or other unit of sugar or the price of any particular Sugar Futures Contract.

U.S. designated contract markets such as the ICE Futures and the NYMEX have established accountability levels on the maximum net long or net short Sugar Futures Contracts that any person or group of persons under common trading control may hold, own or control. For example, the current ICE Futures-established accountability level for investments in Sugar No. 11 Futures Contracts for any one month is 10,000, and the accountability level for all combined months is 15,000. While accountability levels are not fixed ceilings, they are thresholds above

which the exchange may exercise greater scrutiny and control over an investor, including limiting an investor to holding no more Sugar No. 11 Futures Contracts than the amount established by the accountability level. Cleared Sugar Swaps are subject to an ICE Futures accountability level of 10,000 swap positions for all months combined. This limit is measured separately from the accountability levels on Sugar No. 11 Futures Contracts. The Fund does not intend to invest in Sugar Futures Contracts or Cleared Sugar Swaps in excess of any applicable accountability levels.

Accountability levels, position limits and daily price fluctuation limits set by the CFTC and the exchanges have the potential to cause tracking error, which could cause the price of Shares to substantially vary from the Sugar Benchmark and prevent an investor from being able to effectively use the Fund as a way to hedge against sugar-related losses or as a way to indirectly invest in sugar.

The Fund does not intend to limit the size of the offering and will attempt to expose substantially all of its proceeds to the sugar market utilizing Sugar Interests. If the Fund encounters accountability levels, position limits, or price fluctuation limits for Sugar Futures Contracts and/or Cleared Sugar Swaps on ICE Futures, it may then, if permitted under applicable regulatory requirements, purchase Other Sugar Interests and/or Sugar Futures Contracts listed on the NYMEX or foreign exchanges. However, the Sugar Futures Contracts available on such foreign exchanges may have different underlying sizes, deliveries, and prices. In addition, the Sugar Futures Contracts available on these exchanges may be subject to their own position limits and accountability levels. In any case, notwithstanding the potential availability of these instruments in certain circumstances, position limits could force the Fund to limit the number of Creation Baskets that it sells.

Creation and Redemption of Shares

The Funds create and redeem Shares only in blocks called “Creation Baskets” and “Redemption Baskets”, respectively, each consisting of 50,000 Shares. Only Authorized Purchasers may purchase or redeem Creation Baskets or Redemption Baskets. The Shares are not individually redeemable.

A more detailed description of Wheat Interests, Soybean Interests and Sugar Interests and other aspects of the applicable commodities markets, as well as investment risks, are set forth in the Registration Statement. All terms relating to the Funds that are referred to, but not defined in, this proposed rule change are defined in the Registration Statement.

Principal Risks

The Registration Statement includes discussion associated with an investment in the Shares. Among these are that investing in Wheat, Soybean or Sugar Interests subjects the Funds to the risks of the wheat, soybean and sugar markets, and this could result in substantial fluctuations in the price of the Fund's Shares; changes in the price of the Shares could substantially vary from the changes in the spot price of the applicable commodity; changes in the Fund's NAV may not correlate well with changes in the price of the applicable Benchmark; changes in the price of a Fund's Shares on the NYSE Arca may not correlate perfectly with changes in the NAV of a Fund's Shares; and future regulatory developments may significantly and adversely affect the Funds. Additional risks include the Funds' operating risks; risk of leverage and volatility; over-the-counter contract risk; and international markets risk. See the Registration Statement for a complete discussion of risks.

Exchange Rules Applicable to Trading in the Shares

The Shares are considered equity securities, thus rendering trading in the Shares subject to the Exchanges' existing rules governing the trading of equity securities.

Trading Hours

Trading in the shares on EDGA and EDGX Exchanges (the "Exchanges") is on a UTP basis and is subject to the Exchanges equity trading rules. The shares will trade from 8:00 a.m. until 8:00 p.m. Eastern Time. Members trading the shares during the Extended Market Sessions (Pre-opening and Post-closing sessions) are exposed to the risk of the lack of the calculation or dissemination of underlying index value or intraday indicative value ("IIV"). For certain derivative securities products, an updated underlying index value or IIV may not be calculated or publicly disseminated in the Extended Market hours. Since the underlying index value and IIV are not calculated or widely disseminated during Extended Market hours, an investor who is unable to calculate implied values for certain derivative securities products during Extended Market hours may be at a disadvantage to market professionals.

Trading Halts

The Exchanges will halt trading in the Shares in accordance with Exchange Rules 14.1(c)(4). The grounds for a halt under this Rule include a halt by the primary market because it stops trading the Shares and/or a halt because dissemination of the IIV or applicable currency spot price has ceased, or a halt for other regulatory reasons. In addition, the Exchanges will stop trading the Shares if the primary market de-lists the Shares.

Suitability

Trading in the Shares on the Exchanges will be subject to the provisions of EDGA and EDGX Exchange Rules 3.7. Members recommending transactions in the Shares to customers should make a determination that the recommendation is suitable for the customer. In addition, members must possess sufficient information to satisfy the "know your customer" obligation that is embedded in Exchange Rules 3.7.

Members also should review FINRA Notice to Members 03-71 for guidance on trading these products. The Notice reminds members of their obligations to: (1) conduct adequate due diligence to understand the features of the product; (2) perform a reasonable-basis suitability analysis; (3) perform customer-specific suitability analysis in connection with any recommended transactions; (4) provide a balanced disclosure of both the risks and rewards associated with the particular product, especially when selling to retail investors; (5) implement appropriate internal controls; and (6) train registered persons regarding the features, risk and suitability of these products.

Delivery of a Prospectus

Prospectuses may be obtained through the Sponsor or on the Funds' website, teucrium.com. The Prospectus does not contain all of the information set forth in the registration statement (including the exhibits to the registration statement), parts of which have been omitted in accordance with the rules and regulations of the SEC. For further information about the Fund, please refer to the Fund's registration statement.

Exemptive, Interpretive and No-Action Relief Under Federal Securities Regulations

The Commission's Division of Market Regulation (now the Division of Trading and Markets) issued letters dated June 21, 2006 (Letter regarding Rydex Specialized Products CurrencyShares Trusts) and January 19, 2006 (Letter regarding DB Commodity Index Tracking Fund)("No-Action Letters") granting exemptive or no-action relief from certain rules under the Securities Exchange Act of 1934 (the "1934 Act") with respect to certain Commodity Based Investment Vehicles ("CBIVs"). The Fund relies on such exemptive or no-action relief. Members are referred to the full text of the No-Action Letters, available at www.sec.gov, for additional information.

Regulation M Exemptions

The June 21 No-Action Letter provides an exemption under paragraph (d) of Rule 101, permitting persons who may be deemed to be participating in a distribution of CBIV Shares to bid for or purchase shares during their participation in such distribution. The No-Action Letter also provides an exemption under paragraph (e) of Rule 102, permitting a CBIV and its affiliated the purchasers to redeem shares in Baskets during the continuous offering of the shares.

The exemptions from Rules 101 and 102 of Regulation M are subject to the condition that such transactions in shares or any related securities are not made for the purpose of creating actual, or apparent, active trading in or raising or otherwise affecting the price of such securities.

Section 11(d) and Rule 11d1-2

In the January 19, 2006 No-Action Letter, the Staff stated that it will not recommend enforcement action to the Commission under Section 11(d)(1) of the Exchange Act if broker-dealers (other than the distributor) that do not create or redeem shares but engage in both proprietary and customer transactions in shares exclusively in the secondary market extend or maintain or arrange for the extension or maintenance of credit on shares in connection with such secondary market transactions.

In addition, the Staff stated that it will not recommend enforcement action to the Commission under Section 11(d)(1) of the Exchange Act if broker-dealers other than the distributor treat shares, for the purposes of Rule 11d1-2 under the Exchange Act, as "securities issued by a registered unit investment trust as defined in the Investment Company Act of 1940" and thereby extend or maintain or arrange for the extension or maintenance of credit on shares that have been owned by the persons to whom credit is provided for more than 30 days, in reliance on the exemption contained in the rule.

This Regulatory Information Circular is not a statutory Prospectus. Members should consult the Funds' Registration Statement, SAI, Prospectus and the Funds' website for relevant information.
