Subject: UBS AG Exchange Traded Access Securities Linked to the Alerian MLP Infrastructure Index

Background Information on the Notes

UBS AG (the "Issuer") has issued Exchange Traded Access Securities ("E-TRACS" or "Notes") linked to the Alerian MLP Infrastructure Index (the "Index"). The Notes were priced at \$25 each and mature on April 2, 2040.

The E-TRACS are senior unsecured debt securities that provide exposure to potential price appreciation in the Index, subject to an Accrued Tracking Fee (as described in the prospectus) based on a Quarterly Tracking Fee of 0.2125% (equivalent to 0.85% per annum). Investing in the Notes involves significant risks. Investors may lose some or all of their principal at maturity, early redemption or upon exercise by the Issuer of its call right if the level of the Index as measured by the VWAP Level (calculated as described in the prospectus) declines or does not increase by an amount sufficient to offset the Accrued Tracking Fee and the Redemption Fee Amount, if applicable. The Notes may pay a quarterly coupon during their term. Investors will receive a cash payment at maturity or upon exercise by the Issuer of its call right, based on the performance of the Index less the Accrued Tracking Fee, as described in the prospectus. Investors will receive a cash payment upon early redemption based on the performance of the Index less the Accrued Tracking Fee and the Redemption Fee amount. Payment at maturity or upon early redemption is subject to the creditworthiness of the Issuer. In addition, the actual and perceived creditworthiness of the Issuer will affect the market value, if any, of the Notes prior to maturity, call or early redemption.

The Coupon Amount will equal the sum of the cash distributions that a hypothetical holder of Index constituents would have been entitled to receive in respect of the Index constituents during the relevant period, reduced by the Accrued Tracking Fee.

For each Note, unless earlier redeemed or called, investors will receive at maturity a cash payment equal to (a) the product of (i) the Principal Amount and (ii) the Index Performance Ratio as of the last Index Business Day in the Final Measurement Period plus (b) the final Coupon Amount minus (c) the Accrued Tracking Fee as of the last Index Business Day in the Final Measurement Period, plus (d) the Stub Reference Distribution Amount as of the last Index Business Day in the Final Measurement Period, if any. This cash payment is referred to as the "Cash Settlement Amount." If the amount so calculated is less than zero, the payment at maturity will be zero.

Index Performance Ratio: Final VWAP Level / Initial VWAP Level

The Initial VWAP Level will be 487.420. The Final VWAP Level will be determined by the VWAP Calculation Agent, as the arithmetic mean of the VWAP Levels measured on each Index Business Day during the Final Measurement Period or the Call Measurement Period, or on any Redemption Measurement Date, as applicable.

Please see the prospectus for the Notes for more details regarding the calculations and details regarding the Index.

Principal Risks

It is expected that the market value of the Notes will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.

Exchange Rules Applicable to Trading in the Notes

The Notes are considered equity securities, thus rendering trading in the Notes subject to the Exchange's existing rules governing the trading of equity securities.

Trading Hours

Trading in the shares on EDGA and EDGX Exchanges (the "Exchanges") is on a UTP basis and is subject to the Exchanges equity trading rules. The shares will trade from 8:00 a.m. until 8:00 p.m. Eastern Time. Members trading the shares during the Extended Market Sessions (Pre-opening and Post-closing sessions) are exposed to the risk of the lack of the calculation or dissemination of underlying index value or intraday indicative value ("IIV"). For certain derivative securities products, an updated underlying index value or IIV may not be calculated or publicly disseminated in the Extended Market hours. Since the underlying index value and IIV are not calculated or widely disseminated during Extended Market hours, an investor who is unable to calculate implied values for certain derivative securities products during Extended Market hours may be at a disadvantage to market professionals.

Suitability

Trading in the Shares on the Exchanges will be subject to the provisions of EDGA and EDGX Exchange Rules 3.7. Members recommending transactions in the Shares to customers should make a determination that the recommendation is suitable for the customer. In addition, members must possess sufficient information to satisfy the "know your customer" obligation that is embedded in Exchange Rules 3.7.

Members also should review FINRA Notice to Members 03-71 for guidance on trading these products. The Notice reminds members of their obligations to: (1) conduct adequate due diligence to understand the features of the product; (2) perform a reasonable-basis suitability analysis; (3) perform customer-specific suitability analysis in connection with any recommended transactions; (4) provide a balanced disclosure of both the risks and rewards associated with the particular product, especially when selling to retail investors; (5) implement appropriate internal controls; and (6) train registered persons regarding the features, risk and suitability of these products.

Trading Halts

The Exchanges will halt trading in the Shares of a Trust in accordance with Exchange Rules 14.1(c)(4). The grounds for a halt under this Rule include a halt by the primary market because it stops trading the Shares and/or a halt because dissemination of the IIV or applicable currency spot price has ceased, or a halt for other regulatory reasons. In addition, the Exchanges will stop trading the Shares of a Trust if the primary market de-lists the Shares.

Delivery of a Prospectus

Pursuant to federal securities laws, investors purchasing Shares must receive a prospectus prior to or concurrently with the confirmation of a transaction. Investors purchasing Shares directly from the Fund (by delivery of the Deposit Amount) must also receive a prospectus.

Prospectuses may be obtained through the Distributor or on the Fund's website. The Prospectus does not contain all of the information set forth in the registration statement (including the exhibits to the registration statement), parts of which have been omitted in accordance with the rules and regulations of the SEC. For further information about the Fund, please refer to the Trust's registration statement.

This Regulatory Information Circular is not a statutory Prospectus. Members should consult the Trust's Registration Statement, SAI, Prospectus and the Fund's website for relevant information.
