**Subject: DB Agriculture Double Long ETN
DB Agriculture Double Short ETN
DB Agriculture Long ETN
DB Agriculture Short ETN**

Background Information on the Notes

As more fully explained in the Registration Statement No. 333-137902, the ETN's issued by Deutsche Bank AG are linked to the month over month performance of a total return version of the Deutsche Bank Liquid Commodity Index – Optimum Yield Agriculture™ (“Index”), less an investor fee. The return on the Index is derived by combining the returns on two component indices: the DB 3-Month T-Bill Index and the Deutsche Bank Liquid Commodity Index – Optimum Yield Agriculture™ Excess Return (“agriculture index”). DB Agriculture Double Short Exchange Traded Notes due April 1, 2038 (“Agriculture Double Short ETNs”) and DB Agriculture Short Exchange Traded Notes due April 1, 2038 (“Agriculture Short ETNs”) offer investors short, or inverse, exposure to the agriculture index, meaning the value of the Agriculture Double Short ETNs and the Agriculture Short ETNs will increase with monthly depreciations and decrease with monthly appreciations of the agriculture index. DB Agriculture Double Long Exchange Traded Notes due April 1, 2038 (“Agriculture Double Long ETNs”) and DB Agriculture Long Exchange Traded Notes due April 1, 2038 (“Agriculture Long ETNs”) offer investors long exposure to the agriculture index, meaning the value of the Agriculture Double Long ETNs and the Agriculture Long ETNs will increase with monthly appreciations and decrease with monthly depreciations in the agriculture index. In addition, Agriculture Double Short ETNs and Agriculture Double Long ETNs are two times leveraged with respect to the agriculture index and, as a result, will benefit from two times any beneficial, but will be exposed to two times any adverse, monthly performance of the agriculture index. The ETNs will initially be issued in denominations of \$25. For a more complete description of the ETNs and the payment at maturity, repurchase and repurchase value, repurchase mechanics, valuation, index factors, fees and risk factors, consult the prospectuses (“Prospectus”).

Information on the Underlying Indexes

Deutsche Bank Liquid Commodity Index – Optimum Yield Agriculture™ Excess Return:

The agriculture index is intended to reflect the price changes, positive or negative, in a basket of futures contracts on four agricultural commodities (each such futures contract, an “underlying futures contract”; each such commodity, an “underlying commodity”). The “relevant exchange” is, with regard to a futures contract on corn, soybeans or wheat, the

Board of Trade of the City of Chicago, Inc. or its successor (“CBOT”), and, with regard to a futures contract on sugar, ICE Futures U.S., Inc. or its successor (“ICE”).

The agriculture index is calculated on an excess return, or unfunded, basis and has been calculated back to a base date of December 2, 1988. On the base date the closing level of the agriculture index was 100.

DB 3-Month T-Bill Index:

The TBill index is intended to approximate the returns from investing in 3-month United States Treasury bills on a rolling basis.

On any index business day, the closing level of TBill index is equal to the TBill index closing level on the index business day immediately preceding such index business day multiplied by the product of (i) the sum of (a) one and (b) the T-bill accrual factor for such index business day and (ii) the sum of (a) one and (b) the T-bill accrual factor for such index business day raised to the power of the number of days which are not index business days during the period from (but excluding) the index business day immediately preceding such index business day to (but excluding) such index business day.

Valuation of the Securities

According to the Prospectuses, an intraday “Indicative Value” meant to approximate the intrinsic economic value of the ETNs will be published under the Bloomberg, as noted below:

<u>Exchange-Traded Note</u>	Indicative Value
Agriculture Double Short ETNs	AGAIV
Agriculture Double Long ETNs	DAGIV
Agriculture Short ETNs	ADZIV
Agriculture Long ETNs	AGFIV

The term “indicative value” refers to the value at a given time based on the following equation:

Repurchase value = current principal amount per security X applicable index factor X applicable fee factor where:

Current principal amount	=	For the period from the inception date to March 31, 2008 (such period, the “initial calendar month”), the current principal amount will equal \$25.00 per security. For each subsequent calendar month, the current principal amount will be reset as follows on the monthly reset date: <i>New current principal amount = previous current principal amount X applicable index factor on the applicable monthly valuation date X fee factor on the applicable monthly valuation date</i>
--------------------------	---	--

Applicable index factors	=	Index factor for Agriculture Double Short ETNs = $1 + \text{TBill index return} - (2 \times \text{Agriculture index return})$ Index factor for Agriculture Double Long ETNs = $1 + \text{TBill index return} + (2 \times \text{Agriculture index return})$ Index factor for Agriculture Short ETNs = $1 + \text{TBill index return} - (\text{Agriculture index return})$ Index factor for Agriculture Long ETNs = $1 + \text{TBill index return} + (\text{Agriculture index return})$
Applicable fee factor	=	On any given day, the fee factor will be calculated as follows: $1 - [\text{Investor fee of } 0.75\% \text{ per annum} \times \text{day count fraction}]$.

Repurchase

According to the Prospectus, the Securities may be repurchased prior to maturity. Offers to repurchase at least 200,000 securities (or an integral multiple of 50,000 securities in excess thereof) from a single offering or more to Deutsche Bank no later than 10:00 a.m., New York City time, beginning on April 15, 2008 and ending on the final valuation date, on your desired valuation date. For a complete description of the repurchase procedures and payment upon repurchase, see the Prospectus.

Risk Factors Related to Investing in the ETNs

The ETNs are unsecured promises of Deutsche Bank and are not secured debt. The ETNs are riskier than ordinary unsecured debt securities. As stated in the Prospectus, an investment in the ETNs includes but is not limited to the following risks: carries certain risks:

- The principal of the securities is not protected and the ETNs may lose all or a significant portion of their value;
- Even if the Agriculture index and TBill index at maturity or upon repurchase by Deutsche Bank have moved beneficially relative to their initial levels, an investor may receive less than their initial investment in the securities;
- The Agriculture Double Short ETNs or the Agriculture Double Long ETNs, any adverse monthly performance will be leveraged, meaning an investor will lose an amount from the current principal amount at a rate of 2% for every 1% of adverse performance of the Agriculture index (subject to any positive return on the TBill index and to application of the fee factor);
- If the current principal amount increases above \$25, any subsequent adverse monthly performance will result in a larger dollar reduction from the current principal amount than if the current principal amount remained constant at \$25;

- If the current principal amount decreases below \$25, any subsequent beneficial monthly performance will result in a smaller dollar increase on the current principal amount than if the current principal amount remained constant at \$25;
- It is possible that the securities will be accelerated and the investment will be lost before the scheduled maturity of the securities;
- There are restrictions on the minimum number of securities that may be offer to Deutsche Bank for repurchase;
- A fee of up to \$0.03 per security will be charged upon a repurchase;
- The market value of the securities may be influenced by many unpredictable factors;
- The ETNs return will not reflect the return on a direct investment in Agriculture index;
- Changes in Deutsch Bank's credit ratings may affect the market value of the securities;
- An investor will not receive interest payments on the securities or have rights in the subindex components;
- There may not be an active trading market in the securities; sales in the secondary market may result in significant losses;
- Suspension or disruptions of market trading in commodities and related futures may adversely affect the value of the securities;
- Concentration risks associated with the Index may adversely affect the value of the securities;
- Trading by Deutsche Bank and other transactions by Deutsche Bank and/or its affiliates in instruments linked to the sub-indices or index components may impair the market value of the securities;
- The liquidity of the market for the securities may vary materially over time;
- The business activities of Deutsche Bank may create conflicts of interest;
- If a market disruption event has occurred or exists on a valuation date or the final valuation date, the calculation agent can postpone the determination of the index factor for each offering of securities, the maturity date or a repurchase date; and
- The U.S. tax consequences of an investment in the ETNs are unclear.

Exchange Rules Applicable to Trading in the Notes

The Notes are considered equity securities, thus rendering trading in the Notes subject to the Exchange's existing rules governing the trading of equity securities.

Trading Hours

Trading in the shares on EDGA and EDGX Exchanges (the “Exchanges”) is on a UTP basis and is subject to the Exchanges equity trading rules. The shares will trade from 8:00 a.m. until 8:00 p.m. Eastern Time. Members trading the shares during the Extended Market Sessions (Pre-opening and Post-closing sessions) are exposed to the risk of the lack of the calculation or dissemination of underlying index value or intraday indicative value (“IIV”). For certain derivative securities products, an updated underlying index value or IIV may not be calculated or publicly disseminated in the Extended Market hours. Since the underlying index value and IIV are not calculated or widely disseminated during Extended Market hours, an investor who is unable to calculate implied values for certain derivative securities products during Extended Market hours may be at a disadvantage to market professionals.

Trading Halts

The Exchanges will halt trading in the Shares of a Trust in accordance with Exchange Rules 14.1(c)(4). The grounds for a halt under this Rule include a halt by the primary market because it stops trading the Shares and/or a halt because dissemination of the IIV or applicable currency spot price has ceased, or a halt for other regulatory reasons. In addition, the Exchanges will stop trading the Shares of a Trust if the primary market de-lists the Shares.

Suitability

Trading in the Shares on the Exchanges will be subject to the provisions of EDGA and EDGX Exchange Rules 3.7. Members recommending transactions in the Shares to customers should make a determination that the recommendation is suitable for the customer. In addition, members must possess sufficient information to satisfy the “know your customer” obligation that is embedded in Exchange Rules 3.7.

Members also should review FINRA Notice to Members 03-71 for guidance on trading these products. The Notice reminds members of their obligations to: (1) conduct adequate due diligence to understand the features of the product; (2) perform a reasonable-basis suitability analysis; (3) perform customer-specific suitability analysis in connection with any recommended transactions; (4) provide a balanced disclosure of both the risks and rewards associated with the particular product, especially when selling to retail investors; (5) implement appropriate internal controls; and (6) train registered persons regarding the features, risk and suitability of these products.

Delivery of a Prospectus

Pursuant to federal securities laws, investors purchasing Shares must receive a prospectus prior to or concurrently with the confirmation of a transaction. Investors purchasing Shares directly from the Fund (by delivery of the Deposit Amount) must also receive a prospectus.

Prospectuses may be obtained through the Distributor or on the Fund’s website. The Prospectus does not contain all of the information set forth in the registration statement (including the exhibits to the registration statement), parts of which have been omitted in

accordance with the rules and regulations of the SEC. For further information about the Fund, please refer to the Trust's registration statement.

No-Action Relief Under Federal Securities Regulations

The Securities and Exchange Commission has issued no-action relief from certain provisions of and rules under the Securities Exchange Act of 1934 (the "Exchange Act"), regarding trading in Barclays iPath Exchange Traded Notes (SEC Letter dated July 27, 2006) and Deutsche Bank AG Exchange-Traded Notes (SEC Letter dated October 17, 2007) for securities with structures similar to that of the securities described herein (the "Letters"). As what follows is only a summary of the relief outlined in the Letters, the Exchange also advises interested Members to consult the Letters, for more complete information regarding the matters covered therein.

Regulation M Exemptions

Generally, Rules 101 and 102 of Regulation M is an anti-manipulation regulation that, subject to certain exemptions, prohibits a "distribution participant" and the issuer or selling security holder, in connection with a distribution of securities, from bidding for, purchasing, or attempting to induce any person to bid for or purchase, any security which is the subject of a distribution until after the applicable restricted period, except as specifically permitted in Regulation M. The provisions of the Rules apply to underwriters, prospective underwriters, brokers, dealers, and other persons who have agreed to participate or are participating in a distribution of securities, and affiliated purchasers of such persons.

The Letters state that the SEC Division of Trading and Markets will not recommend enforcement action under Rule 101 of Regulation M against persons who may be deemed to be participating in a distribution of the notes to bid for or purchase the notes during their participation in such distribution.

Rule 102 of Regulation M prohibits issuers, selling security holders, or any affiliated purchaser of such person from bidding for, purchasing, or attempting to induce any person to bid for or purchase a covered security during the applicable restricted period in connection with a distribution of securities effected by or on behalf of an issuer or selling security holder. Rule 100 of Regulation M defines "distribution" to mean any offering of securities that is distinguished from ordinary trading transactions by the magnitude of the offering and the presence of special selling efforts and selling methods.

The Letters state that the SEC Division of Trading and Markets will not recommend enforcement action under Rule 102 of Regulation M against Barclays and its affiliated purchasers who bid for or purchase or redeem notes during the continuous offering of the notes.

Section 11(d)(1) of the Exchange Act; Exchange Act Rule 11d1-2

Section 11(d)(1) of the Exchange Act generally prohibits a person who is both a broker and a dealer from effecting any transaction in which the broker-dealer extends credit to a customer on any security which was part of a new issue in the distribution of which he or she participated as a member of a selling syndicate or group within thirty days prior to such transaction.

The Letter states that the SEC Division of Trading and Markets will not recommend enforcement action under Section 11(d)(1) of the Exchange Act against broker-dealers who treat the notes, for purposes of Rule 11d1-2, as “securities issued by a registered...open-end investment company as defined in the Investment Company Act” and thereby, extend credit or maintain or arrange for the extension or maintenance of credit on the notes that have been owned by the persons to whom credit is provided for more than 30 days, in reliance on the exemption contained in the rule.

This Regulatory Information Circular is not a statutory Prospectus. Members should consult the Trust’s Registration Statement, SAI, Prospectus and the Fund’s website for relevant information.
