**Subject: iPath GBP/USD Exchange Rate ETN
 iPath JPY/USD Exchange Rate ETN**

Background Information on the Notes

As more fully explained in the Prospectus Supplements dated September 4, 2007 ("Prospectus") for the iPath ETN's ("ETN's" or "Securities") linked the performance to a specific currency exchange rate that measures the relative values of two currencies issued by Barclays Bank PLC ("Barclays"). For a more complete description, see the website at <http://www.ipathetn.com> or consult each Prospectus.

Description of the Notes

The ETN's are a series of securities of Barclays that provide for a cash payment at maturity or upon earlier redemption at the holder's option, based on the performance of a particular Index subject to the adjustments described below. The original issue price of each Security will be \$50. The Securities will not have a minimum principal amount that will be repaid and, accordingly, payment on the Notes prior to or at maturity may be less than the original issue price of the Securities. In fact, the value of an Index must increase for the investor to receive at least the \$50 principal amount per Security at maturity or upon redemption. If the value of an Index decreases or does not increase sufficiently to offset the investor fee (described below), the investor will receive less, and possibly significantly less, than the \$50 principal amount per Security. In addition, holders of the Securities will not receive any interest payments from the Securities. The Securities will have a term of 30 years.

Underlying Indexes

iPath JPY/USD Exchange Rate ETN is linked to the performance of the Japanese yen / U.S. dollar exchange rate, which is the number (or fraction) of U.S. dollars that can be purchased for one Japanese yen (the "JPY/USD exchange rate" or the "Index"). We will determine the JPY/USD exchange rate by dividing one by the U.S. dollar / Japanese yen exchange rate, as reported each day shortly after 10:00 a.m. on Reuters page 1FED or any successor page, and truncating the quotient to ten decimal places. The U.S. dollar / Japanese yen exchange rate is a foreign exchange spot rate that measures the relative values of two currencies, the Japanese yen and the U.S. dollar. When the Japanese yen appreciates relative to the U.S. dollar, the U.S. dollar / Japanese yen exchange rate decreases, the JPY/USD exchange rate increases and the value of the Securities increases; when the Japanese yen depreciates relative to the U.S. dollar, the U.S. dollar / Japanese yen exchange rate increases, the JPY/USD exchange rate decreases and the value of the Securities decreases. The currency component on any given day will be equal to the JPY/USD exchange rate on that day (or, if such day is not a trading day, the

JPY/USD exchange rate on the immediately preceding trading day) divided by the JPY/USD exchange rate on the inception date.

iPath GBP/USD Exchange Rate ETN is linked to the performance of the British pound / U.S. dollar exchange rate (the “GBP/USD exchange rate” or the “Index”). The GBP/USD exchange rate is a foreign exchange spot rate that measures the relative values of two currencies, the British pound and the U.S. dollar. When the British pound appreciates relative to the U.S. dollar, the GBP/USD exchange rate (and the value of the Securities) increases; when the British pound depreciates relative to the U.S. dollar, the GBP/USD exchange rate (and the value of the Securities) decreases. The GBP/USD exchange rate is expressed as a rate that reflects the number of U.S. dollars that can be exchanged for one British pound in the interbank market for settlement in two days, as reported each day shortly after 10:00 a.m. on Reuters page 1FED or any successor page. The currency component on any given day will be equal to the GBP/USD exchange rate on that day (or, if such day is not a trading day, the GBP/USD exchange rate on the immediately preceding trading day) *divided by* the GBP/USD exchange rate on the inception date.

Payment at Maturity

If you hold your Securities to maturity, you will receive a cash payment equal to (1) the principal amount of your Securities *times* (2) the index factor on the final valuation date *minus* (3) the investor fee on the final valuation date.

The index factor on any given day will be equal to the currency component on that day *times* the accumulation component on that day. Valuation date means each business day from May 17, 2007 to May 7, 2037, inclusive or, if such date is not a trading day, the next succeeding trading day, not to exceed five business days. We refer to Thursday, May 7, 2037, as the “final valuation date”.

Early Redemption

Subject to the notification requirements described in the applicable Prospectus, you may redeem your Securities on any redemption date during the term of the Securities. If you redeem your Securities, you will receive a cash payment in an amount equal to the daily redemption value, which equals (1) the principal amount of your Securities *times* (2) the index factor on the applicable valuation date *minus* (3) the investor fee on the applicable valuation date. You must redeem at least 50,000 Securities at one time in order to exercise your right to redeem your Securities on any redemption date.

A redemption date is the third business day following each valuation date (other than the final valuation date). The final redemption date will be the third business day following the valuation date that is immediately prior to the final valuation date.

Redemption Mechanics

In order to redeem your Securities on a redemption date, you must deliver a notice of redemption to us via email by no later than 11:00 a.m. on the business day prior to the applicable valuation date and follow the procedures as set forth in the applicable Prospectus.

Investor Fee

The investor fee is equal to 0.40% per year *times* the principal amount of your Securities *times* the index factor, calculated on a daily basis in the following manner: The investor fee on the inception date will equal zero. On each subsequent calendar day until maturity or early redemption, the investor fee will increase by an amount equal to (1) 0.40% *times* (2) the principal amount of your Securities *times* (3) the index factor on that day (or, if such day is not a trading day, the index factor on the immediately preceding trading day) *divided by* (4) 365.

Because the investor fee reduces the amount of your return at maturity or upon redemption, the applicable exchange rate may need to increase significantly in order for you to receive at least the principal amount of your investment at maturity or upon redemption. If the increase in the applicable exchange rate (as enhanced or reduced by the accumulation component) is insufficient to offset the negative effect of the investor fee, or the applicable exchange rate (as enhanced or reduced by the accumulation component) decreases, you will receive less than the principal amount of your investment at maturity or upon redemption.

The accumulation component will be calculated on a daily basis in the following manner: The accumulation component on the inception date will equal one. On each subsequent business day until maturity or early redemption, the accumulation component will equal (1) the accumulation component on the immediately preceding business day *times* (2) the sum of one *plus* the product of the deposit rate *times* the relevant day count fraction.

Investment Risks

The Securities are unsecured promises of Barclays and are not secured debt. The Securities are riskier than ordinary unsecured debt securities. As stated in the Prospectuses, an investment in the Securities includes but is not limited to the following risks including but not limited to the uncertain principal risk, currency risk, trading market risk (See each ETN Prospectus for additional risk factors).

Exchange Rules Applicable to Trading in the Notes

The Notes are considered equity securities, thus rendering trading in the Notes subject to the Exchange's existing rules governing the trading of equity securities.

Trading Hours

Trading in the shares on EDGA and EDGX Exchanges (the "Exchanges") is on a UTP basis and is subject to the Exchanges equity trading rules. The shares will trade from 8:00 a.m. until 8:00 p.m. Eastern Time. Members trading the shares during the Extended Market Sessions (Pre-opening and Post-closing sessions) are exposed to the risk of the lack of the calculation or dissemination of underlying index value or intraday indicative value ("IIV"). For certain derivative securities products, an updated underlying index value or IIV may not be calculated or publicly disseminated in the Extended Market hours. Since the underlying index value and IIV are not calculated or widely disseminated during Extended Market hours, an investor who is unable to calculate implied values for certain derivative securities products during Extended Market hours may be at a disadvantage to market professionals.

Trading Halts

The Exchanges will halt trading in the Shares of a Trust in accordance with Exchange Rules 14.1(c)(4). The grounds for a halt under this Rule include a halt by the primary market because it stops trading the Shares and/or a halt because dissemination of the IIV or applicable currency spot price has ceased, or a halt for other regulatory reasons. In addition, the Exchanges will stop trading the Shares of a Trust if the primary market de-lists the Shares.

Suitability

Trading in the Shares on the Exchanges will be subject to the provisions of EDGA and EDGX Exchange Rules 3.7. Members recommending transactions in the Shares to customers should make a determination that the recommendation is suitable for the customer. In addition, members must possess sufficient information to satisfy the “know your customer” obligation that is embedded in Exchange Rules 3.7.

Members also should review FINRA Notice to Members 03-71 for guidance on trading these products. The Notice reminds members of their obligations to: (1) conduct adequate due diligence to understand the features of the product; (2) perform a reasonable-basis suitability analysis; (3) perform customer-specific suitability analysis in connection with any recommended transactions; (4) provide a balanced disclosure of both the risks and rewards associated with the particular product, especially when selling to retail investors; (5) implement appropriate internal controls; and (6) train registered persons regarding the features, risk and suitability of these products.

Delivery of a Prospectus

Pursuant to federal securities laws, investors purchasing Shares must receive a prospectus prior to or concurrently with the confirmation of a transaction. Investors purchasing Shares directly from the Fund (by delivery of the Deposit Amount) must also receive a prospectus.

Prospectuses may be obtained through the Distributor or on the Fund’s website. The Prospectus does not contain all of the information set forth in the registration statement (including the exhibits to the registration statement), parts of which have been omitted in accordance with the rules and regulations of the SEC. For further information about the Fund, please refer to the Trust’s registration statement.

No-Action Relief Under Federal Securities Regulations

The SEC has issued no-action relief from certain provisions of and rules under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), regarding trading in other Barclays iPath securities with structures similar to that of the Notes. See letter dated July 27, 2006, from James A. Brigagliano, Acting Associate Director, Office of Trading Practices and Processing, Division of Market Regulation, to George H. White (the “Letter”). As what follows is only a summary of the relief outlined in the Letter, the Exchange also advises interested members to consult the Letter, for more complete information regarding the matters covered therein.

Regulation M Exemptions

Generally, Rules 101 and 102 of Regulation M is an anti-manipulation regulation that, subject to certain exemptions, prohibits a “distribution participant” and the issuer or selling security holder,

in connection with a distribution of securities, from bidding for, purchasing, or attempting to induce any person to bid for or purchase, any security which is the subject of a distribution until after the applicable restricted period, except as specifically permitted in Regulation M. The provisions of the Rules apply to underwriters, prospective underwriters, brokers, dealers, and other persons who have agreed to participate or are participating in a distribution of securities, and affiliated purchasers of such persons.

The Letter states that the SEC Division of Market Regulation will not recommend enforcement action under Rule 101 of Regulation M against persons who may be deemed to be participating in a distribution of the notes to bid for or purchase the notes during their participation in such distribution.

Rule 102 of Regulation M prohibits issuers, selling security holders, or any affiliated purchaser of such person from bidding for, purchasing, or attempting to induce any person to bid for or purchase a covered security during the applicable restricted period in connection with a distribution of securities effected by or on behalf of an issuer or selling security holder. Rule 100 of Regulation M defines “distribution” to mean any offering of securities that is distinguished from ordinary trading transactions by the magnitude of the offering and the presence of special selling efforts and selling methods.

The Letter states that the SEC Division of Market Regulation will not recommend enforcement action under Rule 102 of Regulation M against Barclays and its affiliated purchasers who bid for or purchase or redeem notes during the continuous offering of the notes.

Section 11(d)(1) of the Exchange Act; Exchange Act Rule 11d1-2

Section 11(d)(1) of the Exchange Act generally prohibits a person who is both a broker and a dealer from effecting any transaction in which the broker-dealer extends credit to a customer on any security which was part of a new issue in the distribution of which he or she participated as a member of a selling syndicate or group within thirty days prior to such transaction.

The Letter states that the SEC Division of Market Regulation will not recommend enforcement action under Section 11(d)(1) of the Exchange Act against broker-dealers who treat the notes, for purposes of Rule 11d1-2, as “securities issued by a registered . . . open-end investment company as defined in the Investment Company Act” and thereby, extend credit or maintain or arrange for the extension or maintenance of credit on the notes that have been owned by the persons to whom credit is provided for more than 30 days, in reliance on the exemption contained in the rule.

This Regulatory Information Circular is not a statutory Prospectus. Members should consult the Trust’s Registration Statement, SAI, Prospectus and the Fund’s website for relevant information.
