Issuer Website: <http://www.totalmerrill.com>

Primary Listing Exchange: NYSE Arca

Primary Exchange Circular: RB-08-241 (November 23, 2008)

The purpose of this information circular is to outline various rules and policies that will be applicable to trading in this new product on the Exchange, as well as to provide certain characteristics and features of the STARS.

Background Information on the STARS

The Issuer has issued Strategic Accelerated Redemption Securities Linked to the S&P 500 Index (the "Index"). The Notes were priced at \$10 per note and mature May 4, 2010.

The STARS are senior, unsecured debt securities of Merrill Lynch & Co., Inc. that provide for an automatic call of the Notes if the closing level of the S&P 500 Index on any observation date is greater than or equal to the starting value of the Index, as determined on the pricing date. An investor's payment schedule is indicated below:

If called in May 2009:	\$11.0520 per unit
If called in November 2009:	\$11.5780 per unit
If called in May 2010:	\$12.1040 per unit

If the notes are not called prior to the maturity date, then at maturity:

- (1) If the ending index value is greater than or equal to the threshold value (1,268.4060), then investors will receive \$10 per Note.
- (2) If the ending index value is less than the threshold value (1,268.4060), then investors will receive \$10 + [\$10 x (ending index value – threshold value / starting value)] per Note.

The Starting Value of the S&P 500 Index equals: 1,409.34

Please see the prospectus for the STARS for more details regarding the calculations.

It is expected that the market value of SSM will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.

Contact your tax advisor for information concerning taxation.
