**Primary Exchange Circular:** RB-08-385-7 (December 17, 2008)

The purpose of this information circular is to outline various rules and policies that will be applicable to trading in this new product on the Exchange, as well as to provide certain characteristics and features of the Notes.

### Background Information on the Notes

The Issuer has issued Principal-Protected Certificates ("Notes") linked to the S&P 500 Index (the "Index"). The Notes were priced at \$10 each and mature on July 11, 2013.

At maturity for each Note, investors will receive the sum of (i) \$10.00 plus (ii) a Supplemental Distribution Amount calculated as follows:

- i) If the Final Index Level is greater than the Starting Index Level, the Supplemental Distribution Amount will equal the product of (i) \$10.00 times (ii) the Index Return Percentage;
- ii) Otherwise the Supplemental Distribution Amount will equal zero.

The Index Return Percentage is:

$$\frac{\text{Final Index Level} - \text{Starting Index Level}}{\text{Starting Index Level}}$$

The Starting Index Level equals: 1314.29.

The Notes are guaranteed by the creditworthiness of the Issuer.

It is expected that the market value of the Notes will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level

of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.

The Trustee for the securities is The Bank of New York.

### **Exchange Rules Applicable to Trading in the Notes**

Trading in the Notes on BATS is subject to BATS equity trading rules.

### **Trading Hours**

The Notes will trade on BATS between 8:00 a.m. and 4:00 p.m. ET.

Please note that trading in the Notes during the Exchange's pre-opening session may result in additional trading risks which include: (1) that the current underlying indicative value may not be updated during the pre-opening session, (2) the indicative value may not be updated during the pre-opening session, (3) lower liquidity in the pre-opening session may impact pricing, (4) higher volatility in the pre-opening session may impact pricing, (5) wider spreads may occur in the pre-opening session, and (6) because the indicative value is not calculated or widely disseminated during the pre-opening session, an investor who is unable to calculate an implied value for the Notes in that session may be at a disadvantage to market professionals.

### **Trading Halts**

BATS will halt trading in the shares of a security in accordance with BATS Rule 14.1(c)(4). The grounds for a halt under BATS Rule 14.1(c)(4) include a halt by the primary market because the intraday indicative value of the security and/or the value of its underlying index are not being disseminated as required, or a halt for other regulatory reasons.
