Circular # RG-00-113

DATE: July 25, 2000
TO: CBOE NDX Mini (MNX) Participants
FROM: Facilities Committee
RE: NDX Mini (MNX) – Arbitrage Positions

It has been decided that the CBOE NDX Mini, MNX, will begin trading on Monday, August 14, 2000. The product will trade at post 7, in half the area that is currently designated for the DJX (see diagram on the reverse side). Since the DJX will only be traded on the northeast side of the pit, the arbitrage positions that were designated for the DJX, will now be used in support of the MNX and the occupants of the DJX booths will be relocated into OEX sky box booths. Therefore, if your firm is interested in an arbitrage position in support of the MNX, you must complete the form on the reverse side of this notice immediately and returned it to Jane Gill, Director Trading Floor Support. Completed forms may be dropped off with the 4th or 6th floor receptionist. All applications must be returned by Friday, July 28, 2000.

Since there are a limited number of positions, only one position will be assigned per firm or market maker group. Firms requesting a space must utilize the space as of the start up. Should there be more applications than available positions, clerk spaces will be designated at the back of the crowd or OEX sky booths will be assigned. The Facilities Committee along with input from the Index Floor Procedure Committee will complete assignment of these positions during the week of July 31, 2000. Again, all applications must be received by Friday, July 28, 2000.

For start up, there will be no outside lines installed on any pit Exchangephones. **Outside access will be available through pin numbers only.** Applications for lines on a pit phone may be submitted on the current Broad-Based Application form and given to Nancy Harrigan for review by the Index Floor Procedure Committee. Applications may be obtained in the 2nd floor Telecommunications Service Center.

Questions concerning telephones may be directed to Nancy Harrigan @ 786-7309. Questions concerning allocation or the pit configuration may be directed to Jane Gill @ 786-7250.
