The NASD suspended trading in shares of China Energy Savings Technology, Inc. (CESV/CQO), on the opening of business on May 19, 2006.

Trading on the CBOE in existing series of CQO options is subject to the following restrictions. Only closing transactions may be affected in any series of CQO options except for (i) opening transactions by market makers executed to accommodate closing transactions of other market participants and (ii) opening transactions by CBOE member organizations to facilitate the closing transactions of public customers executed as crosses pursuant to and in accordance with CBOE Rule 6.74(b) or (d).

Member organizations should ensure that they have appropriate procedures in place to prevent their customers from entering opening orders in this restricted option class.
