Regulatory Circular RG14-055

Date: April 8, 2014

To: CBOE Streaming Markets (CSM) Data Feed Customers and Trading Permit Holders
From: Market Data Services
RE: CBOE Book Depth Data Feeds

Commencing in mid-May, 2014, Market Data Express (MDX) is planning to offer new CBOE Book Depth Data Feeds that include all outstanding quotes and standing orders up to the first five price levels on each side of the market (with aggregate size at each level). Data will be refreshed every 2 minutes. The new data feeds will include non-strategy as well as complex strategy (COB) data for CBOE products. Current CSM BBO and COB data feed customers can arrange to receive the corresponding Book Depth Data Feed at no additional cost unless additional lines/ports are required for additional bandwidth.

Additional Information:

For technical information regarding additional lines/ports, please contact our API Group at api@cboe.com. Customers who want to receive this service should contact Ginny Kowalczyk or Tom Knorring to arrange for an appropriate contract.
