## Regulatory Circular RG14-089

**Date:** June 10, 2014

**To:** Trading Permit Holders

**From:** CBOE Help Desk

**RE:** Bid-Ask Differentials

---

### **This Regulatory Circular replaces RG14-007**

CBOE's rules allow it to set the bid-ask differential requirements on a class-by-class basis. Effective June 12, 2014, the bid-ask differentials for opening quotes in classes EEM, NDX and RUT will be the same as the bid-ask differentials in effect for intra-day quotes in those classes. Further, the intra-day bid-ask differentials for class EEM will be widened to match those for classes NDX and RUT.

The current differentials for all option classes are set forth on page 2 of this Regulatory Circular.

Requests for bid-ask relief on a class-by-class basis should be directed to the CBOE Help Desk and include an explanation as to why bid-ask relief is needed.

		\$8.00 where the bid is more than \$100 but does not exceed \$200, and				
		\$12.00 where the bid is more than \$200				

The bid-ask differentials do not apply to at-the-money or in-the-money series where the quote width on the primary market of the underlying security, or the quote width calculated by the Exchange or its agent for various indices, is wider than the differentials set forth above. For these series, the bid-ask differential may be as wide as the quote width on the primary market of the underlying security or calculated by the Exchange or its agent, as applicable. "In-the-money series" are defined as follows: for call options, all strike prices below the offer or last sale in the underlying security (whichever is higher); and for put options, all strike prices above the bid or last sale in the underlying security (whichever is lower).
