Re: **ILX Rollout**

Effective the week of March 21, the CBOE will begin rollout of ILX/WDN PC terminals to booth locations on the trading floor. The terminals will be a replacement for booth-installed Quotron terminals. ILX/WDN terminals will run Windows-based software and will include both an ILX window for market data as well as a CBOE WDN window for CBOE in-house displays and functions. Cost to the firms will be $350 per terminal per month as filed with the Securities and Exchange Commission made effective April 1, 1994.

ILX features included in this package are as follows:

- **Snap and Expanded Quotes with dynamic updates**
- **Custom Monitor allowing 26 pages of 72 symbols each**
- **Quote Montage**
- **Options Montage**
- **Time and Quotes for stocks and options**
- **Market and Technical Statistics**
- **On-line Symbol Book**
- **Computer-based training**
- **Alerts and Alert history**
- **On-line contextual Help function**
- **CBOE Private News and News Retrieval**

CBOE WDN features are as follows:

- **CBOE Class Display**
- **CBOE MDR (time&sales)**
- **All ORS Booth functions (BERS(XB/XS), IQOD, BK, CXL request, CXL report,   Fill reporting)**
- **Bottom-line Recap**
- **CBOE Blackboard**

Firms will be contacted in the coming weeks so that training and conversion may be scheduled.
