BATS BYX Exchange, BZX Exchange and BATS Options Certification Data Center Migration Schedule

Overview

Please be advised that BATS is currently in process of relocating its certification environments for the BYX Exchange, BZX Exchange and BATS Options Exchange from the NJ2 data center in Weehawken, NJ to the Equinix NY5 data center in Secaucus, NJ. **The existing certification environments in the NJ2 data center will be decommissioned on Friday, October 31, 2014. Members will be required to utilize the certification environments located in the NY5 data center after this date.**

NY5 certification environments are active and available for use by BATS Members effective immediately.

Physical Ports and Logical Certification Ports

Existing logical certification ports within NJ2 for BYX Exchange, BZX Exchange and BATS Options will not be replicated to the NY5 certification environments. To request physical or logical port access to NY5 certification environments, Members must use the appropriate port request form within the BATS Member Web Portal. Links to the respective form are found in the menu as shown below.

Note that only Members with BATS Member Web Portal access that are designated by their firm to have access for requesting new ports will be able to utilize this form. Access to the form can be obtained by contacting the BATS Trade Desk.

More Information

Please contact the BATS Trade Desk or your [Director of Sales](#) with any questions. We appreciate your continued support of BATS and look forward to earning more of your business. As always, we are committed to our Members and to Making Markets Better.
