

Cboe EDGX Options Exchange Introduces Customer Indicator Field on Complex Multicast TOP Feed

Overview

Cboe EDGX Options Exchange is pleased to announce the addition of a Customer Indicator field for the Complex Multicast TOP feed effective **Monday, January 22, 2018**. The *Bit Fields* field will allow users to identify when there are customer orders at the best bid or offer price on the Complex Order Book (“COB”).

Technical Details

The *Bit Fields* field will be a single byte field that is added to the end of the following complex TOP message types:

- ❖ Market Snapshot (short/long)
- ❖ Single Side Update (short/long)
- ❖ Two Side Update (short/long)
- ❖ Top Trade

The possible values for this field are:

Bit 0: Reserved

Bit 1: If set, bid has customer orders

Bit 2: If set, ask has customer orders

Users that take the Complex Multicast TOP feed from EDGX Options must be prepared to handle this additional field on the effective date.

Testing Opportunities

Testing of the new *Bit Fields* field is available in the EDGX Options Certification environment effective immediately.

More Information

For more information refer to the following technical specification:
