

Final Reminder: Cboe BZX and EDGX Options Exchanges to Introduce Trade Condition Field on Single Leg Multicast PITCH Feed

Overview

As [previously announced](#), the Cboe BZX and EDGX Options Exchanges will add a *Trade Condition* field for the single leg Multicast PITCH feed effective **Tuesday, January 16, 2018**. The *Trade Condition* field will allow customers to identify executions resulting from a complex (spread) trade. This field will be space-filled for non-complex trades, including for all trades that occur on the BZX Options Exchange.

Technical Details

The *Trade Condition* field will be a single byte field that is added to the end of the following PITCH message types:

- ❖ Order Executed
- ❖ Order Executed at Price/Size
- ❖ Trade (short/long/expanded)

The possible values for this field are:

- ❖ (space): Normal trade
- ❖ S: Spread trade

Customers receiving the single leg Multicast PITCH feed from the BZX or EDGX Options Exchanges **must be prepared to handle this additional field on the effective date.**

Testing Opportunities

Testing of the new *Trade Condition* field is available in the BZX and EDGX Options Certification environments effective immediately.

More Information

For more information refer to the following technical specification:

❖ [US Equities/Options Multicast PITCH](#)
