

Pulse Trader Workstation Enhancement Release 5.0.0

Reference ID: C2018112100

Overview

Beginning the week of November 26, 2018, Cboe will begin rollout of the PULSe Trader Workstation enhancements described below. PULSe users will be notified in advance of the rollout to their specific terminals.

Order Log

A new Order Log Status filter has been added that will allow traders to filter on Derived PULSe to PULSe orders. With the addition of the new Derived filter, the existing Accepted filter has been adjusted to only show orders that have been accepted and not yet derived. Prior to this new filter, the Accepted filter displayed both accepted and derived orders.

The manual bust feature has been enhanced to allow users to manually bust orders containing a Client ID not associated with a Drop Copy Client ID session. Accordingly, the Client ID field may be populated for purposes other than drop copies.

Quick Ticket

The Quick Ticket has been enhanced to simplify entry of a cash value on an order ticket. A new Cash Spread field, when touched, will activate a numeric keypad. A value may be entered followed by the selection of credit, debit or even (C/D/E). A "C" (cash) indicator will automatically precede the entered value in the comment field.

Note that users will continue to have access to the Microsoft keypad.

Import from a .csv file

The PULSe application will now allow users to import a .csv file to create a basket of orders in the Order Log. To import, select File / Import from CSV, choose a file and press "Queue". Imported orders will have a status of "queued". Please contact the Cboe PULSe Help Desk for information on file layouts.

Other Enhancements

On December 3, 2018, Cboe Options will change the symbol for VIX weekly options to VIXW and change the minimum price increment for VIX weekly options to \$.01. Support for .VIXW options is included in this release.

A Frequent Trader ID field has been added to the CFE entry tickets.

Additional Information

Questions regarding this upgrade may be directed to Cboe PULSe Help Desk and to the Cboe Operations Support Center (OSC).

We appreciate your business and remain committed to powering your potential with Cboe products, technologies and solutions.
