

Transport Layer Security Minimum Version Requirement

Reference ID: C2019062000

Overview

Please be advised that **effective Friday, August 23, 2019 after the regular market close**, Cboe will begin enforcing a new requirement for U.S. equities, options and futures customers that utilize Cboe's Customer Web Portal including the associated Secure Web API. As of the effective date, the minimum version of the Transport Layer Security ("TLS") protocol which will be supported will be version 1.2. While this requirement is a minimum version requirement, Cboe strongly recommends that its customers use the latest version of TLS for any interactions with Cboe web site data or APIs.

Rollout Schedule

Milestone	Effective Date
Requirement Effective in Certification	7/19/19
Requirement Effective in Production	8/23/19

We appreciate your business and remain committed to powering your potential with Cboe products, technologies, and solutions.
