

# Potential Mechanism for Interim All-Electronic SPX Compression Forum Cross

Reference ID: C2020032500

## Overview

### **Applicable Cboe Exchanges:** Cboe Options

Cboe Global Markets is pursuing potential changes that would permit SPX compression transactions in an all-electronic forum on the Cboe Options Exchange, *subject to regulatory review*. As the Exchange prepares for this possibility, we would like to ask TPHs and customers who have positions that would be candidates for compression trades to submit their applicable positions to [the Cboe compression website](#).

Interested parties should follow all format requirements applicable to Cboe's existing compression forum data submission procedures.

The Exchange will keep all such data confidential and is seeking the data in an effort to identify potential impact of an all-electronic compression mechanism that may inform our rule filing.

If you have not been participating in the Compression Forum Manager but would like to be involved in this process, please contact the Compression Forum using [the contact form](#) for file format and other details to facilitate your position uploads.

## Additional Information

Additional information regarding the Compression Forum Manager and file format can be found in this [Compression Forum Manager guidance document](#). Please contact the Cboe Trade Desk for support or with any questions.

We appreciate your business and remain committed to powering your potential with Cboe products, technologies, and solutions.
