

Reminder – Cboe EDGX Equities Exchange Routing Strategy Update – Conversion of CLC to DRT

Reference ID: C2020013000

Overview

Applicable Cboe Exchange: EDGX Equities

Effective February 3, 2020, *subject to regulatory review*, Cboe EDGX Equities (“EDGX”) Exchange will replace the Comprehensive Liquidity Check (CLC) routing mechanism used for seeking non-lit liquidity with the Dark Routing Technique (DRT) mechanism in order to harmonize the routing offerings across Cboe Equities Exchanges. In addition, EDGX will consolidate multiple routing strategies with similar execution objectives.

Technical Details

To support this change the system will convert any instances of ROUD and ROUQ values in the *RoutStrategy* (FIX Tag 9400) instruction to the ROUZ value and convert any instance of ROUE values to the ROUT value. Routed trades executed at non-lit destinations will receive a *ContraBroker* (FIX Tag 375) of DRT where they used to receive CLC.

Testing Opportunities

This functionality is currently available for testing in the EDGX Equities certification environment.

Additional Information

For additional information, refer to the following technical specification.
