PULSe Trader Workstation Enhancement

On Monday, modifications to the new PULSe Trader Workstation commenced. New features include allowing users to email or export a user-specified list of order fills from the Order Log. In addition, the Order Type filter in the Order Log has been expanded to include the Cabinet order type, and the search date in the Historic Order Log has been modified to default to the previous business day upon login.

PULSe users will continue to be notified in advance of rollouts to their specific terminals. For details on the additional enhancements, see the [Tradedesk Update](#).

Cboe Opening Auction Feed to Launch Monday

As previously [announced](#), Cboe Global Markets will launch the Cboe Opening Auction Feed on Cboe Options Exchange on **Monday, July 9**.

The Cboe Opening Auction Feed will provide market participants with a view of auction information over a separate multicast market data feed delivered through the Cboe CSM platform.

The Cboe Opening Auction Feed has been developed to extend visibility into Cboe Options opening auction process to a wider audience and will be provided free of charge. See the [Tradedesk Update](#).

Cboe Celebrates 35th Anniversary of S&P 500 Index Options (SPX)

Thirty-five years ago, Cboe revolutionized the financial world with the introduction of options on broad-based stock indexes. On July 1, 1983, just 10 years after creating the listed options market, Cboe launched SPX options with posted volume of 350 contracts—a sharp contrast with current-day volume of nearly 1.5 million contracts per day.
