Cboe Plans September 10 Launch of U.S. High Yield Corporate Bond Index Futures Trading

Cboe plans to offer trading in Cboe® iBoxx® iShares® \$ High Yield Corporate Bond Index (IBHY) futures beginning **Monday, September 10**, pending regulatory review.

The \$8.5 trillion U.S. corporate bond market includes robust cash and exchange-traded fund (ETF) markets, however, there is currently no exchange-listed futures product linked to U.S. corporate bonds. The futures will allow users to hedge and mitigate high yield corporate bond credit risk, and more generally allow them to efficiently allocate to the corporate bond market and implement fixed-income trading strategies.
