

## Cboe Options Exchange Migration Update

The Cboe Options Exchange (C1) migration to Bats technology remains on track for **Monday, October 7**, subject to regulatory review. Daily trading of test symbols in the new C1 production environment is ongoing and the third weekend test is planned for **Saturday, August 24**.

Target Date	Customer Milestone
Available	Update default C1 production session settings
Available	Participate in weekday production environment testing using test symbols
8/24/19 9/14/19 9/28/19 (DR) 10/5/19	Participate in weekend test opportunity (Including support for the trading floor)
10/7/19	Completion of C1 migration to Bats technology in NY5 (Go-Live), there will be no parallel period.

For more information related to the C1 migration, visit the [Technology Integration](#) website.

## Testing of Cboe Volatility Settlements Opening Process

Cboe will simulate the planned enhancements to the opening process for volatility settlements with monthly tests leading up to **Monday, October 7**, with the final test planned for **Saturday, October 5**. See the [Tradedesk Update](#) for the test checklist.

## C1 Technology Migration Feature Pack 9 Update

The introduction of complex instruments with underlying stock legs was postponed for two weeks and will now be made available on EDGX Options Exchange on **Friday, August 16**, subject to regulatory review. For additional technical details, see the [Tradedesk Update](#).

## C2 and EDGX Options Update to FIX SecurityType Field for Complex Executions

As part of the release of Feature Pack 9 on **Friday, August 16**, Cboe EDGX Options Exchange plans to introduce a change to the values set in the US Options FIX *SecurityType* field (FIX Tag 167). On **Friday, September 6**, this same change will be released to C2 Options Exchange. See the [Tradedesk Update](#).

## Cboe Reports July 2019 Trading Volume

## Cboe and EDGX to List Monday Expiring Weekly Options in XSP

On **Monday, August 12**, Cboe and EDGX Options Exchanges will list Monday-expiring Weekly options on the Mini-S&P 500 Index (XSP). For more information, see the [Tradedesk Update](#).

## AMERIBOR® Futures Product Launch

On **Friday, August 16**, Cboe Futures Exchange (CFE) plans to launch trading in AMERIBOR futures. See the [Tradedesk Update](#), or visit the [AMERIBOR](#) webpage for more details.

## Clock Sync Logs for PAR and PULSe

Effective immediately, Cboe will provide evidence of PAR and PULSe time clock synchronization consistent with the requirements of the CAT National Markets Plan (CAT NMS Plan). Trading Permit Holders (TPHs) may now request their respective clock synchronization data reports or logs for the PAR and PULSe workstations, consistent with the requirements of the Consolidated Audit Trail National Markets Plan (CAT NMS Plan), by contacting the Cboe Operations Support Center (OSC) at [osc@cboe.com](mailto:osc@cboe.com). See the [Tradedesk Update](#).

We encourage your input on these and other exchange matters. Please feel free to contact us.
