1 Introduction

This document provides a transparent and easily accessible view of the methodology used to calculate the Cboe S&P 500 5% Put Protection Index (PPUT) and the Cboe S&P 500 Tail Risk Index (PPUT3M), collectively referred to in this document as “the Indices”.

1.1 Index Objective

The objectives of the Indices covered by this document are as follows:

- The **Cboe S&P 500 5% Put Protection Index (PPUT)** is designed to track the performance of a hypothetical risk-management strategy that consists of a long position indexed to the S&P 500 Index (SPX Index) and a long position in the monthly 5% Out-of-the-Money (OTM) SPX Put options.
- The **Cboe S&P 500 Tail Risk Index (PPUT3M)** is designed to track the performance of a hypothetical risk-management strategy that consists of (a) holding the S&P 500 portfolio and collecting dividends and (b) buying 10% out-of-the-money SPX puts that expire on the quarterly cycle, i.e. March, June, September and December.

1.2 Supporting Documentation

This Methodology should be read in conjunction with the following document:

[Cboe_Index_Policies_Practices](#)

2 Index Construction

The Indices are total return indices. Dividends paid on the component stocks of the underlying index are functionally re-invested in the index portfolio.

2.1 Index Constituents

The Indices consist of the components as listed below.

Index	Type	Position	Ticker	Underlying Index Name	Expiration	Option Type
Cboe S&P 500 5% Put Protection Index (PPUT)	Index	Long	SPX	S&P 500	n/a	n/a
	Option	Long	SPX	S&P 500	Monthly	Put
Cboe S&P 500 Tail Risk Index (PPUT3M)	Index	Long	SPX	S&P 500	n/a	n/a
	Option	Long	SPX	S&P 500	Quarterly	Put

2.2 Index Parameters

Index Name	Index Ticker	Option Settlement	Option Premium Determination
Cboe S&P 500 5% Put Protection Index	PPUT	At 9:30 a.m. ET against the Special Opening Quotation of the S&P 500 Index (SOQ). The option settlement value is determined as $\text{Put_old}_{\text{settle}} = \text{Max}(0, K_{\text{old}} - \text{SOQ}_t)$ where K_{old} is the strike price of the old option.	Volume weighted average price (VWAP)* between 11:30 a.m. and 12:00 p.m. ET.
Cboe S&P 500 Tail Risk Index	PPUT3M	At 9:30 a.m. ET against the Special Opening Quotation of the S&P 500 Index (SOQ). The option settlement value is determined as $\text{Put_old}_{\text{settle}} = \text{Max}(0, K_{\text{old}} - \text{SOQ}_t)$ where K_{old} is the strike price of the old option.	Volume weighted average price (VWAP)* from 11:30 a.m. to 1:30 p.m. ET.

* Cboe calculates the VWAP in two steps: first, Cboe excludes trades in the new SPX put option between the times as mentioned in the table above (different per index) that are identified as uppercase A – H and lowercase f – t. This will remove all forms of late, cancel and spread orders; and second, Cboe calculates the weighted average of all remaining transaction prices of the new SPX put option between the relevant times, with weights equal to the fraction of total remaining volume transacted at each price during this period. The source of the transaction prices used in the calculation of the VWAP is OPRA. If no transactions occur at the new put strike during the specified timeslot, then the new put options are deemed purchased at the last ask price reported before the VWAP period ends.

2.3 Index Rebalance

Rebalances timelines are performed according to the following table.

Index Name	Index Ticker	Roll Date	Strike Determination	Strike Price Selection
Cboe S&P 500 5% Put Protection Index	PPUT	Third Friday of each month. Should the third Friday fall on an exchange holiday, the roll date is the preceding Business Day.	Roll Date	First available strike below 95% of the last disseminated value of the SPX Index before 11:00 a.m. ET.
Cboe S&P 500 Tail Risk Index	PPUT3M	Third Friday of each quarter (March, June, September, December). Should the third Friday fall on an exchange holiday, the roll date is the preceding Business Day.	Roll Date	Strike at or above 90% of the value of the S&P 500 reported just before 11:00 a.m. ET. If this strike is not listed, the closest strike above is selected.

On the initial roll date of the Indices, a hypothetical long position in the underlying index is entered, while simultaneously a unit of an out-of-the-money (OTM) put option is purchased. The strike of the option is selected in line with the rules described in the table above.

On subsequent roll dates, the old option position settles and a new put option position is entered, following the same rule as on the initial roll date. The long position in the equity index remains unchanged.

Details on the option settlement and determination of the option premiums can be found in section 2.2.

2.4 Options Pricing

The put option quotes are sourced from the Cboe Options Exchange via the Options Price Reporting Authority (OPRA) feed.

3 Index Calculations

The Indices are calculated according to the following formula:

$$Index_t = Index_{t-1} * (1 + R_t)$$

where:

- $Index_t$ is the level of the Index on day t ;
- $Index_{t-1}$ is the level of the Index on the previous day; and
- R_t is the return of the Index.

3.1 Non-Roll Date Calculations

The non-roll date return of the Indices is calculated as:

$$(1 + R_t) = (S_t + Div_t + Put_{-}S_t) / (S_{t-1} + Put_{-}S_{t-1})$$

where:

- S_t is the SPX Index close price on day t . For intraday calculations, the current reported value of the S&P 500 Index is used;
- S_{t-1} is the SPX Index close price on day $t-1$;
- Div_t represents the ordinary cash dividends payable on the component stocks underlying the S&P 500 Index that trade “ex-dividend” at date t expressed in S&P 500 Index points;

- Put_S_t is the average of the last bid-ask quote of the OTM SPX Put option before 4:00 p.m. ET. For intraday calculations, the average of the current reported bid and ask prices of the put option is used; and
- Put_S_{t-1} is the average of the last bid-ask quote of the SPX Put option before 4:00 p.m. ET on the previous day.

3.2 Roll Date Calculations

The roll date return of the Indices is calculated in three steps. The following formula is used to calculate the return from the previous day's market close to present day's morning settlement:

$$(1 + R_1) = (SOQ_t + Div_t + Put_S_old_{settle}) / (S_{t-1} + Put_S_old_{t-1})$$

where:

- SOQ_t is the Special Opening Quotation of the SPX Index on the roll day;
- $Put_S_old_{settle} = \text{Max}(0, K_{old} - SOQ_t)$ is the settlement value of the expiring SPX Put option; and
- $Put_S_old_{t-1}$ is the average of the last bid-ask quote of the expiring SPX Put option before 4:00 p.m. ET on the previous day.

The following formula is used to calculate the return from morning settlement to the moment the new SPX Put option is deemed purchased:

$$(1 + R_2) = SPX_{vwap} / SOQ_t$$

where:

- SPX_{vwap} is the volume weighted average price of the SPX Index, calculated using disseminated values of the SPX Index based on the same time and weights used to calculate the new SPX Put option VWAP.

The following formula is used to calculate the return from the time the new SPX Put option position is deemed purchased to the market close:

$$(1 + R_3) = (S_t + Put_S_new_t) / (SPX_{vwap} + Put_S_new_{vwap})$$

where:

- $Put_S_new_t$ is the average of the last bid-ask quote of the new SPX Put option before 4:00 p.m. ET on the roll day. For intraday calculations, the average of the current reported bid and ask prices of the put option is used; and
- $Put_S_new_{vwap}$ is the VWAP of the new SPX Put option determined during the VWAP period as indicated in section 2.2.

The product of the three parts (i.e., $1 + R_t = (1 + R_1) * (1 + R_2) * (1 + R_3)$) is the total return of the roll day.

3.3 Intraday Calculations

On non-roll dates the intraday calculations follow the non-roll date calculations.

On roll dates, the intraday calculations follow the roll date calculations. On roll dates, the PPUT and PPUT3M indices will not tick intraday until after the VWAP period has ended and the SOQ value has been made available. A daily closing value will be disseminated on roll dates following the close of U.S. trading hours.

4 Calculation and Dissemination

The Indices are calculated and disseminated as follows on each Business Day. A Business Day is defined as a day when the Cboe Options Exchange is open for the Cboe Regular Trading Hours (RTH) session. The Indices follow the Cboe Options Exchange holiday schedule.

Index Name	Index Ticker	Dissemination Frequency	Dissemination Hours
Cboe S&P 500 5% Put Protection Index	PPUT	15 seconds	Between 9:31 a.m. and 4:15 p.m. ET
Cboe S&P 500 Tail Risk Index	PPUT3M	15 seconds	Between 9:31 a.m. and 4:15 p.m. ET

5 Index Information

Index Name	Index Ticker	Base Date	Launch Date	Base Value	Currency
Cboe S&P 500 5% Put Protection Index	PPUT	June 30, 1986	August 3, 2015	100	USD
Cboe S&P 500 Tail Risk Index	PPUT3M	March 19, 2004	Aug 2, 2021	100	USD

6 Appendix 1 - Changes

Major changes described in this document since November 19, 2024 are as follows:

Change Summary	Effective Date	Previous Language	Updated Language
-	-	-	-

7 Appendix 2 – Document Information

Version Number ¹	1.1
Last Revised Date	August 15, 2025

¹ Prior to November 19, 2024, the methodologies of the Indices were separately maintained in a legacy format.

Disclosures and Disclaimers Related to Cboe Indices

Cboe Global Indices, LLC and Cboe Europe Indices, B.V. (collectively, the “Cboe Index Providers”, and individually a “Cboe Index Provider”), are both subsidiaries of Cboe Global Markets, Inc. (Cboe Global Markets, Inc., the Cboe Index Providers, and the other subsidiaries and affiliates of Cboe Global Markets, Inc. are collectively referred to herein as the “Cboe Companies” and those entities are individually referred to as a “Cboe Company”).

The Cboe Index Providers are each an index provider that administers, calculates and distributes indices and other values (as applicable) (collectively, “Cboe Indices” and individually a “Cboe Index”). Additional information regarding the Cboe Index Providers and their operations is available at www.cboe.com/indices/.

Nothing herein constitutes an offer of services. The information herein is provided solely for informational purposes. Cboe Indices are calculated and administered (as described in relevant methodologies, rules and other information) without regard to the needs of any particular person, entity, or group of persons, using market information, including, without limitation, market data from exchanges owned and operated by other Cboe Companies.

Index and benchmark values for dates or time periods prior to an index launch date, if any, are calculated using a theoretical approach involving back-testing historical data in accordance with the methodology in place on the launch date (unless otherwise stated). Back-testing involves the theoretical application of the index methodology in hindsight and therefore does not involve actual performance and may not produce performance commensurate with prospective application of the methodology. No back-tested approach can completely account for the impact of decisions that might have been made if calculations were made at the same time as certain underlying market conditions occurred. Supporting documentation for statements, comparisons, statistics or other technical data provided in this document is available by request at www.cboe.com/contact/.

Past performance of an index or financial product is not indicative of future results. Indices are not financial products that can be invested in directly, but they can be used as the basis for financial products (for example, without limitation, options, futures, mutual funds or exchange-traded funds) or to help manage portfolios.

The Cboe Index Providers are not investment advisers or tax advisers. No decision to buy, hold, or sell any financial product should be made in reliance on any of the information provided herein, and no representation is made regarding the advisability or tax consequences of any investment, whether based on an index or not. Nothing herein should be construed as investment advice. No representation or assurance is made that any financial product will accurately track the performance of an underlying index or provide positive investment returns. Index values and returns are theoretical, and do not reflect the results of actual trading of financial products, nor the value of an actual portfolio, and may not reflect the fees, taxes or other expenses associated with buying, holding or selling investments or the effect of actual market conditions or events. The Cboe Index Providers are not broker-dealers, intermediaries, investment firms or securities exchanges and they do not manage actual financial products. None of the Cboe Companies sponsor, endorse, promote, manage, sell or administer any financial product that is created, sponsored, issued or sold by a third-party, whether based on any Cboe Index or not.

No data, values, or other content contained herein (“Content”) may be copied, modified, reverse-engineered, reproduced, distributed, or stored in a database or retrieval system, in any form or by any means, nor may any Content be used to create a derivative work (e.g., a financial product, service or index) or used to verify or correct other data or information, without the Cboe Index Provider’s prior written consent. Without derogating from the aforementioned, Content shall not be used for any unlawful or unauthorized purposes.

The Cboe Companies, their third-party service or data providers, or any party from whom they have licensed trademarks or indices (collectively, the “Cboe Parties”) do not guarantee the accuracy, completeness, or timeliness of the Content, trademarks, strategies or values, or the methodologies or input data used to calculate index values. The Cboe Parties are not responsible for any errors or omissions, regardless of the cause, or for the results obtained from the use of the Content, index strategies or values, methodologies or input data. THE CONTENT, INDICES AND RELATED STRATEGIES AND METHODOLOGIES ARE PROVIDED “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ANY WARRANTY WITH RESPECT TO MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE. USERS OF CONTENT AND/OR THE CBOE INDICES BEAR ALL RISKS OF LOSS.

WITHOUT LIMITING THE FOREGOING AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL THE CBOE PARTIES BE RESPONSIBLE OR LIABLE TO ANY PERSON OR ENTITY FOR ANY DAMAGES OF ANY KIND, INCLUDING, BUT NOT LIMITED TO, DIRECT, INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE, LOST PROFITS OR LOST OPPORTUNITIES, WHETHER OR NOT A CBOE PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THE FOREGOING LIMITATIONS SHALL APPLY REGARDLESS OF WHETHER A CLAIM ARISES IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE.

The Cboe Index Providers receive compensation in connection with licensing Cboe Indices to third parties and providing calculation services to third parties. Some Cboe Companies operate markets for the trading of financial products and provide services to many organizations, including issuers of securities, investment advisers, broker-dealers, investment banks, other financial institutions and financial intermediaries, and accordingly may

provide or receive fees or other economic benefits to or from those organizations. These organizations may also be Cboe Index Provider licensees or customers, and the Cboe Index Providers may include securities of or relating to such organizations in Cboe Indices.

Cboe®, C2SM, Cboe ClearSM, Cboe Closing Cross®, Cboe DigitalSM, Cboe LIS®, Cboe Futures ExchangeSM, Cboe Global IndicesSM, Cboe Global Markets®, Cboe Options Institute®, Cboe Volatility Index®, Bats®, BIDS Trading®, Buffer ProtectSM, BuyWriteSM, BYX®, BZX®, CFE®, EDGA®, EDGX®, Eris Exchange®, ErisX®, f(t)optionsSM, FLEX®, FLEXible EXchange®, HanweckSM, Hybrid®, LiveVol®, NANO®, Options Institute®, PutWriteSM, Silcexx®, SRVIXSM, Trade AlertSM, VIX®, and XSPSM are trademarks and service marks of the Cboe Companies. Trademarks of the Cboe Companies may only be used with written permission, subject to applicable Cboe Company trademark usage guidelines as published from time to time. Third-party trademarks and service marks used in this document are described below. The values and methodologies for indices branded with the “Cboe” trademark are the property of the relevant Cboe Index Provider.

The Cboe Companies have licensed several trademarks from third parties from whom they have also licensed indices which may be included in this document or in other materials related to Cboe Indices, as follows:

- Dow Jones®, Dow Jones Industrial Average® and DJIA® are trademarks or service marks of Dow Jones Trademark Holdings LLC (“Dow Jones”), have been licensed for use for certain purposes by the Cboe Companies. Derivative indices created, used and distributed by Cboe Companies and any investment products based thereon are not sponsored, endorsed, sold or promoted by Dow Jones, and Dow Jones makes no representation regarding the advisability of investing in any investment product that is based on any such derivative indices.
- FTSE® and the FTSE indices are trademarks and service marks of FTSE International Limited, used under license.
- IHS, IHS Markit, CDX, iBoxx, and iTraxx are trademarks of IHS Markit Limited and its affiliates (“IHS”) and have been licensed for use by the Cboe Companies. Any IHS Markit index referenced herein is the property of IHS Markit and is used under license. Any products that have an IHS Markit index as their underlying interest are not sponsored, endorsed, or promoted by IHS Markit.
- MSCI and the MSCI index names are service marks of MSCI Inc. (“MSCI”) or its affiliates and have been licensed for use by the Cboe Companies. Any derivative indexes and any financial products based on the derivative indexes (“Products”) are not sponsored, guaranteed or endorsed by MSCI, its affiliates or any other party involved in, or related to, making or compiling such MSCI index. Neither MSCI, its affiliates nor any other party involved in, or related to, making or compiling any MSCI index makes any representations regarding the advisability of investing in such Products; or any warranty, express or implied; or bears any liability as to the results to be obtained by any person or any entity from the use of any such MSCI index or any data included therein. No purchaser, seller or holder of any Product, or any other person or entity, should use or refer to any MSCI trade name, trademark or service mark to sponsor, endorse, market or promote Products without first contacting MSCI to determine whether MSCI’s permission is required.
- Nasdaq®, Nasdaq-100®, and Nasdaq-100 Index®, are trademarks of Nasdaq, Inc. (together with its affiliates, the “Corporations”) and are licensed for use by Cboe Exchange, Inc. The CBOE Nasdaq-100 Volatility Index (the “Volatility Index”) and CBOE Nasdaq-100 BuyWrite Index (the “BuyWrite Index”) are not derived, maintained, published, calculated or disseminated by the Corporations. Neither the Volatility Index, the BuyWrite Index nor any product based on such indexes have been passed on by the Corporations as to their legality or suitability. Such products are not issued, endorsed, sold, or promoted by the Corporations. THE CORPORATIONS MAKE NO WARRANTIES AND BEAR NO LIABILITY WITH RESPECT TO THE VOLATILITY INDEX OR BUYWRITE INDEX.
- Russell, Russell 1000®, Russell 2000®, Russell 3000® and Russell MidCap® are registered trademarks of the Frank Russell Company, used under license.
- S&P, S&P 500, US500, 500, THE 500, SPDR, SPX, and DSPX are trade names or trademarks of S&P Dow Jones Indices, LLC or its affiliates (“S&P”). Any products that have an S&P index as their underlying interest are not sponsored, endorsed, sold or promoted by S&P and S&P makes no representation regarding the advisability of investing in any investment product that is based on any such indices.
