

CFE Platform Migration Connectivity Update

Equinix Fee Waiver

Cboe Global Markets has been able to obtain from Equinix a waiver of the initial cross connect install fee and the Equinix monthly recurring charges through February 2018 on new cross connects run for the CFE Integration project. Additionally, if you recently acquired a latency equalized connection directly to the new CFE platform, Equinix has agreed to provide a credit for up to 4 months of service and the associated install fee (if applicable).

TPHs and vendors will need to contact their Equinix representatives directly to ensure they are issued the paperwork necessary to obtain waivers or credits.

More Information

Please contact your Equinix representative or the Cboe NOC for additional information on the Equinix Fee waiver or credit.

We appreciate your continued support and will work hard every day to keep earning your business by powering your potential to stay ahead of an evolving market. As always, we are committed to our customers and to making markets better as your partner in trading.
