Footnotes

¹ Does not include network access to Cboe Europe Systematic Internalisers Technology Services

LD4 physical connections are network latency equalized. The price shown includes cross connect fees charged to Cboe on behalf of each Participant or subscriber.

For LD3, LD9 and Interxion physical connections, Participants and subscribers pay the cross connect fees directly to the data centre provider.

Participants and subscribers of access services who are currently connected to the LD3 environment will not incur duplicate fees when LD9 becomes available during the migration period. To support a smooth transition during the migration period, customers will only be billed for one secondary data centre site. For example, if a customer has a 1G physical port in LD3, they will not be billed for an equivalent 1G physical port in LD9.

Cboe reserves the right to amend the fees herein from time to time, in accordance with the Data Centre Agreement or the Connectivity, Service Bureau and Other Access Services Agreement, as applicable, entered into between the Recipient and Cboe.
