2. Controls to validate and restrict Sponsored Participant orders on entry which include:

- › Block new orders and cancel existing orders
- › Max notional per order per market
- › Max number of shares per order
- › Max number of orders per second per port
- › Max number of orders per symbol per second per port
- › Primary market restriction
- › Restricted stock list
- › Max daily notional (executed + exposed) per port
- › Execution collar

3. Web-based management tools to configure the Sponsored Access controls

See the Sponsored Access Specification on www.markets.cboe.com for additional details.
