Re: QuantShares U.S. Market Neutral Value, Beta and Anti-Beta Funds

Pursuant to Rule 14.1(c)(2) of the Rules of BATS Exchange, Inc. and BATS Y-Exchange, Inc. (each referred to hereafter as “BATS” or the “Exchange”), this Information Circular is being issued to advise you that the following security has been approved for trading on the Exchange as a UTP Derivative Security pursuant to Chapter XIV of the Exchange’s Rules.

<u>Securities (the “Fund”)</u>	<u>Symbol</u>
QuantShares U.S. Market Neutral Value Fund	CHEP
QuantShares U.S. Market Neutral Beta Fund	BTAH
QuantShares U.S. Market Neutral Anti-Beta Fund	BTAL

Commencement of Trading on the Exchange: September 15, 2011

Issuer/Trust: FQF Trust

Issuer Website: www.quant-shares.com

Primary Listing Exchange: NYSE Arca

The purpose of this information circular is to outline various rules and policies that will be applicable to trading in these new products pursuant to the Exchange’s unlisted trading privileges, as well as to provide certain characteristics and features of the Shares. For a more complete description of the Issuer, the Shares and the underlying market instruments or indexes, visit the Issuer Website, consult the Prospectus available on the Issuer Website, examine the Issuer Registration Statement or review the most current information bulletin issued by the Primary Listing Exchange. The Issuer Website, the Prospectus, the Issuer Registration Statement and the Primary Exchange Circular are hereafter collectively referred to as the “Issuer Disclosure Materials.”

Background Information on the Fund

The FQF Trust (the “Trust”) is a management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”). The Trust consists of several exchange-traded funds (each, a “Fund” and collectively, the “Funds”). This circular refers only to the Funds listed above. The shares of each of the Funds listed above are referred to herein as “Shares.” FFCM LLC (the “Advisor”) is the investment advisor for the Funds.

CHEP seeks to track the performance of the Dow Jones U.S. Thematic Market Neutral Value Index (the “Target Value Index”) by investing at least 80% of its net assets (plus any borrowings for investment purposes) in common stock, including the short positions, in the Target Value Index. The Target Value Index is a market neutral index that is dollar-neutral. As such, it identifies long and short securities positions of approximately equal dollar amounts. In choosing to track a market neutral index, the Fund seeks to limit the effects of general market movements on the Fund and to limit the correlation of the performance of the Fund with the market’s overall movements.

The universe for the Target Value Index is the top 1,000 eligible securities by market capitalization in the Dow Jones U.S. Index ("universe"). The securities included in the universe are categorized as belonging to one of 10 sectors. The Target Value Index identifies approximately the 20% of the securities with the highest value ranking within each sector as equal-weighted long positions and approximately the 20% of securities with the lowest value ranking within each sector as equal-weighted short positions. A stock's value ranking is determined by an equally weighted combination of the following ratios within its sector: expected earnings over the next twelve months to price; cash flow over the last twelve months to price; and most recent book value to price. Stocks with higher ratios (below average valuations) within each sector receive higher rankings, and stocks with lower ratios (above average valuations) within each sector receive lower rankings.

Although it is expected that the Fund's assets will be invested in all of the long and short positions that comprise the Target Value Index, the Fund may use a sampling strategy to track the performance of the Target Value Index. A sampling strategy involves investing in a representative sample of the long and short positions in the Target Value Index that, collectively, have an investment profile correlated with the Target Value Index. In either case, the weightings of the long and short positions in the Fund's portfolio may differ from their weightings in the Target Value Index.

For the Fund, value investing entails investing in securities that have below-average valuations based on ratios such as earnings to price or book to price and shorting securities that have above-average valuations based on the same ratios. The performance of the Fund will depend on the differences in the rates of return between its long positions and short positions. For example, in a rising market, if the Fund's long positions appreciate more rapidly than its short positions, the Fund would generate a positive return, which would be the difference between the rates of return between the long positions and short positions. However, if the opposite occurred, the Fund would generate a negative return.

The Fund expects to invest up to 20% of its total assets in instruments other than the long and short positions in the Target Value Index, which FFCM LLC, the Advisor, believes will help the Fund track its Target Value Index. Such instruments are expected to include long and short common stocks not in the Target Value Index, derivatives, including swap agreements based on the Target Value Index and futures contracts on equity indexes, and money market instruments.

The Target Value Index, which is compiled by Dow Jones Indexes, is equal-weighted and sector neutral – meaning that at each reconstitution of the index, all of the components of the index are equal-weighted and the number of long and short positions in each sector in the index approximate the weighting of that sector in the universe. For example, if a sector in the universe comprises 100 securities, the index would identify the 20 securities with the highest ranking within that sector as long positions and the 20 securities with the lowest ranking within that sector as short positions. If between reconstitutions the value of short positions in the Target Value Index exceeds the value of the long positions by an amount that is established by the index provider, the Target Value Index will be rebalanced back to equal weights and sector neutrality. The Target Value Index is reconstituted monthly.

The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that its Target Value Index is concentrated. For purposes of this policy, securities of the U.S. government (including its agencies and instrumentalities) and repurchase agreements collateralized by U.S. government securities are not considered to be issued by members of any industry.

BTAH seeks to track the performance of the Dow Jones U.S. Thematic Market Neutral Beta Index (the "Target Beta Index") by investing at least 80% of its net assets (plus any borrowings for investment purposes) in common stock, including the short positions, in the Target Beta Index. The Target Beta Index is a market neutral index that is dollar-neutral. As such, it identifies long and short securities positions of approximately equal dollar amounts. In choosing to track a market neutral index, the Fund seeks to limit the effects of general market movements on the Fund and to limit the correlation of the performance of the Fund with the market's overall movements.

The universe for the Target Beta Index is the top 1,000 eligible securities by market capitalization in the Dow Jones U.S. Index ("universe"). The securities included in the universe are categorized as belonging to one of 10 sectors. The Target Beta Index identifies approximately the 20% of the securities with the highest betas within each sector as equal-weighted long positions and approximately the 20% of securities with the lowest betas within each sector as equal-weighted short positions. Beta measures the relative volatility of the value of a security compared with that of a market index; beta is calculated using historical market index data. A stock's beta is based on its sensitivity to weekly market movements over the last twelve months as measured by its price movements relative to those of the universe as a whole. High beta stocks are those stocks that are more volatile than the market index, and low beta stocks are those stocks that are less volatile than the market index.

Although it is expected that the Fund's assets will be invested in all of the long and short positions that comprise the Target Beta Index, the Fund may use a sampling strategy to track the performance of the Target Beta Index. A sampling strategy involves investing in a representative sample of the long and short positions in the Target Beta Index that, collectively, have an investment profile correlated with the Target Beta Index. In either case, the weightings of the long and short positions in the Fund's portfolio may differ from their weightings in the Target Beta Index.

For the Fund, beta investing entails investing in securities that have above-average betas and shorting securities that have below-average betas. The performance of the Fund will depend on the differences in the rates of return between these long positions and short positions. For example, in a rising market, if the Fund's long positions appreciate more rapidly than its short positions, the Fund would generate a positive return, which would be the difference between the rates of return between the long positions and short positions. However, if the opposite occurred, the Fund would generate a negative return.

The Fund expects to invest up to 20% of its total assets in instruments other than the long and short positions in the Target Beta Index, which FFCM LLC, the Advisor, believes will help the Fund track its Target Beta Index. Such instruments are expected to include long and short common stocks not in the Target Beta Index, derivatives, including swap agreements based on the Target Beta Index and futures contracts on equity indexes, and money market instruments.

The Target Beta Index, which is compiled by Dow Jones Indexes, is equal-weighted and sector neutral – meaning that at each reconstitution of the index, all of the components of the index are equal-weighted and the number of long and short positions in each sector in the index approximate the weighting of that sector in the universe. For example, if a sector in the universe comprises 100 securities, the index would identify the 20 securities with the highest betas within that sector as long positions and the 20 securities with the lowest betas within that sector as short positions. If between reconstitutions the value of short positions in the Target Beta Index exceeds the value of the long positions by an amount that is established by the index provider, the Target Beta Index will be rebalanced back to equal weights and sector neutrality. The Target Beta Index is reconstituted monthly.

The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that its Target Beta Index is concentrated. For purposes of this policy, securities of the U.S. government (including its agencies and instrumentalities) and repurchase agreements collateralized by U.S. government securities are not considered to be issued by members of any industry.

BTAL seeks to track the performance of the Dow Jones U.S. Thematic Market Neutral Anti-Beta Index (the "Target Anti-Beta Index") by investing at least 80% of its net assets (plus any borrowings for investment purposes) in common stock, including the short positions, in the Target Anti-Beta Index. The Target Anti-Beta Index is a market neutral index that is dollar-neutral. As such, it identifies long and short securities positions of approximately equal dollar amounts. In choosing to track a market neutral index, the Fund seeks to limit the effects of general market movements on the Fund and to limit the correlation of the performance of the Fund with the market's overall movements.

The universe for the Target Anti-Beta Index is the top 1,000 eligible securities by market capitalization in the Dow Jones U.S. Index ("universe"). The securities included in the universe are categorized as belonging to one of 10 sectors. The Target Anti-Beta Index identifies approximately the 20% of the securities with the lowest betas within each sector as equal-weighted long positions and approximately the 20% of securities with the highest betas within each sector as equal-weighted short positions. Beta measures the relative volatility of the value of a security compared with that of a market index; beta is calculated using historical market index data. A stock's beta is based on its sensitivity to weekly market movements over the last twelve months as measured by its price movements relative to those of the universe as a whole. High beta stocks are those stocks that are more volatile than the market index, and low beta stocks are those stocks that are less volatile than the market index.

Although it is expected that the Fund's assets will be invested in all of the long and short positions that comprise the Target Anti-Beta Index, the Fund may use a sampling strategy to track the performance of the Target Anti-Beta Index. A sampling strategy involves investing in a representative sample of the long and short positions in the Target Anti-Beta Index that, collectively, have an investment profile correlated with the Target Anti-Beta Index. In either case, the weightings of the long and short positions in the Fund's portfolio may differ from their weightings in the Target Anti-Beta Index.

For the Fund, anti-beta investing entails investing in securities that have below-average betas and shorting securities that have above-average betas. The performance of the Fund will depend on the differences in the rates of return between these long positions and short positions. For example, in a rising market, if the Fund's long positions appreciate more rapidly than its short positions, the Fund would generate a positive return, which would be the difference between the rates of return between the long positions and short positions. However, if the opposite occurred, the Fund would generate a negative return.

The Fund expects to invest up to 20% of its total assets in instruments other than the long and short positions in the Target Anti-Beta Index, which FFCM LLC, the Advisor, believes will help the Fund track its Target Anti-Beta Index. Such instruments are expected to include long and short common stocks not in the Target Anti-Beta Index, derivatives, including swap agreements based on the Target Anti-Beta Index and futures contracts on equity indexes, and money market instruments.

The Target Anti-Beta Index, which is compiled by Dow Jones Indexes, is equal-weighted and sector neutral – meaning that at each reconstitution of the index, all of the components of the index are equal-weighted and the number of long and short positions in each sector in the index approximate the weighting of that sector in the universe. For example, if a sector in the universe comprises 100 securities, the index would identify the 20 securities with the lowest beta within that sector as long positions and the 20 securities with the highest beta within that sector as short positions. If between reconstitutions the value of short positions in the Target Anti-Beta Index exceeds the value of the long positions by an amount that is established by the index provider, the Target Anti-Beta Index will be rebalanced back to equal weights and sector neutrality. The Target Anti-Beta Index is reconstituted monthly.

The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that its Target Anti-Beta Index is concentrated. For purposes of this policy, securities of the U.S. government (including its agencies and instrumentalities) and repurchase agreements collateralized by U.S. government securities are not considered to be issued by members of any industry.

As described more fully in the Trust's prospectus and Statement of Additional Information ("SAI"), the Funds issue and redeem Shares at net asset value ("NAV") only in large blocks of 50,000 Shares (each block of Shares called a "Creation Unit"), or multiples thereof. As a practical matter, only broker-dealers or large institutional investors with creation and redemption agreements (called Authorized Participants) can purchase or redeem these Creation Units. Except when aggregated in Creation Units, the Shares may not be redeemed with the Funds.

Income dividends, if any, are distributed to shareholders annually. Net capital gains are distributed at least annually.

Shares are held in book-entry form, which means that no Share certificates are issued. The Depository Trust Company or its nominee is the record owner of all outstanding Shares of the Funds and is recognized as the owner of all Shares for all purposes.

The NAV per Share for each Fund is computed by dividing the value of the net assets of the Fund (i.e., the value of its total assets less total liabilities) by the total number of Shares outstanding. Expenses and fees are accrued daily and taken into account for purposes of determining NAV. The NAV of each Fund is determined each business day after the close of trading (ordinarily 4:00 p.m., Eastern Time or "ET") of the New York Stock Exchange. Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

Please see the Fund's prospectus for more information regarding the Fund and its investment objective.

The registration statement for the Funds describes the various fees and expenses for the Funds' Shares. For a more complete description of the Funds and the underlying indexes, visit the Issuer Website.

Principal Risks

Interested persons are referred to the discussion in the prospectus for the Funds of the principal risks of an investment in the Funds. These include tracking error risk (factors causing a Fund's performance to not match the performance of its underlying index), market trading risk (for example, trading halts, trading above or below net asset value), investment style risk, sector risk, investment approach risk, non-diversification risk, issuer-specific risk, management risk, derivatives risk and leverage risk.

Exchange Rules Applicable to Trading in the Shares

Trading in the Shares on BATS is subject to BATS equity trading rules.

Trading Hours

The value of the Index underlying the Shares will be disseminated to data vendors every 15 seconds during Regular Trading Hours.

The Shares will trade on BATS between 8:00 a.m. and 5:00 p.m. ET. Please note that trading in the Shares during the Exchange's Pre-Opening and After Hours Trading Sessions may result in additional trading risks which include: (1) that the current underlying indicative value may not be updated during the Pre-Opening and After Hours Trading Sessions, (2) lower liquidity in the Pre-Opening and After Hours Trading Sessions may impact pricing, (3) higher volatility in the Pre-Opening and After Hours Trading Sessions may impact pricing, (4) wider spreads may occur in the Pre-Opening and After Hours Trading Sessions, and (5) because the indicative value is not calculated or widely disseminated during the Pre-Opening or After Hours Trading Sessions, an investor who is unable to calculate an implied value for the Shares in those sessions may be at a disadvantage to market professionals.

Dissemination of Data

The Consolidated Tape Association will disseminate real time trade and quote information for the Shares to Tape B.

<i>Name</i>	<i>Listing Market</i>	<i>Trading Symbol</i>	<i>IOPV Symbol</i>	<i>NAV Symbol</i>

QuantShares U.S. Market Neutral Anti-Beta Fund	NYSE Arca	BTAL	BTAL.IV	BTAL.NV

Delivery of a Prospectus

BATS Members should be mindful of applicable prospectus delivery requirements under the federal securities laws with respect to transactions in the Fund. Prospectuses may be obtained through the Funds' website. The prospectus for the Fund does not contain all of the information set forth in the Funds' Registration Statement (including the exhibits to the Registration Statement), parts of which have been omitted in accordance with the rules and regulations of the SEC. For further information about the Fund, please refer to its Registration Statement.

In the event that the Fund relies upon an order by the SEC exempting the Shares from certain prospectus delivery requirements under Section 24(d) of the Investment Company Act of 1940 and in the future make available a written product description, BATS Rule 14.1(c)(3) requires that BATS Members provide to all purchasers of Shares a written description of the terms and characteristics of such securities, in a form prepared by the Issuer of the Fund, no later than the time a confirmation of the first transaction in the Shares is delivered to such purchaser. In addition, BATS Members shall include such a written description with any sales material relating to the Shares that is provided to customers or the public. Any other written materials provided by a BATS member to customers or the public making specific reference to the Shares as an investment vehicle must include a statement in substantially the following form: "A circular describing the terms and characteristics of [*the UTP Derivative Securities*] has been prepared by the [*open-ended management investment company name*] and is available from your broker. It is recommended that you obtain and review such circular before purchasing [*the UTP Derivative Securities*]."

A BATS member carrying an omnibus account for a non-member broker-dealer is required to inform such non-member that execution of an order to purchase Shares for such omnibus account will be deemed to constitute agreement by the non-member to make such written description available to its customers on the same terms as are directly applicable to BATS member under this rule.

Upon request of a customer, BATS Members also shall provide a copy of the Prospectus.

Suitability

Trading in the securities on BATS will be subject to the provisions of Exchange Rule 3.7. Members recommending transactions in the securities to customers should make a determination that the recommendation is suitable for the customer.

Trading Halts

BATS will halt trading in the Shares of a security in accordance with BATS Rule 14.1(c)(4). The grounds for a halt under BATS Rule 14.1(c)(4) include a halt by the primary market because the intraday indicative value of the security and/or the value of its underlying index are not being disseminated as required, or a halt for other regulatory reasons. In addition, BATS will stop trading the Shares of a security if the primary market de-lists the security.

Exemptive, Interpretive and No-Action Relief Under Federal Securities Regulations

The Securities and Exchange Commission (the "SEC") has issued letters granting exemptive, interpretive and no-action relief from certain provisions of rules under the Securities Exchange Act of 1934 for exchange-traded securities listed and traded on a registered national securities exchange that meet certain criteria.

AS WHAT FOLLOWS IS ONLY A SUMMARY OF THE RELIEF OUTLINED IN THE NO-ACTION LETTERS REFERENCED ABOVE, THE EXCHANGE ADVISES INTERESTED PARTIES TO CONSULT THE NO-ACTION LETTERS FOR MORE COMPLETE INFORMATION REGARDING THE MATTERS COVERED THEREIN AND THE APPLICABILITY OF THE RELIEF GRANTED IN RESPECT OF TRADING IN SECURITIES. INTERESTED PARTIES SHOULD ALSO CONSULT THEIR PROFESSIONAL ADVISORS.

Regulation M Exemptions

Generally, Rules 101 and 102 of Regulation M prohibit any "distribution participant" and its "affiliated purchasers" from bidding for, purchasing, or attempting to induce any person to bid for or purchase any security which is the subject of a distribution until after the applicable restricted period, except as specifically permitted in Regulation M. The provisions of the Rules apply to underwriters, prospective underwriters, brokers, dealers, and other persons who have agreed to participate or are participating in a distribution of securities.

The SEC has granted an exemption from Rule 101 under Regulation M to permit persons participating in a distribution of shares of the above-mentioned Fund to engage in secondary market transactions in such shares during their participation in such a distribution. In addition, the SEC has granted relief under Regulation M to permit persons who may be deemed to be participating in the distribution of Shares of the above-mentioned Fund (i) to purchase securities for the purpose of purchasing Creation Unit Aggregations of Fund Shares and (ii) to tender securities for redemption in Creation Unit Aggregations. Further, the SEC has clarified that the tender of Fund Shares to the Fund for redemption does not constitute a bid for or purchase of any of the Fund's securities during the restricted period of Rule 101. The SEC has also granted an exemption pursuant to paragraph (e) of Rule 102 under Regulation M to allow the redemption of Fund Shares in Creation Unit Aggregations during the continuous offering of Shares.

Rule 10b-10 (Customer Confirmations for Creation or Redemption of Fund Shares)

Broker-dealers who handle purchases or redemptions of Fund Shares in Creation Unit size for customers will be permitted to provide such customers with a statement of the number of Creation Unit Aggregations created or redeemed without providing a statement of the identity, number and price of shares of the individual securities tendered to the Fund for purposes of purchasing Creation Unit Aggregations ("Deposit Securities") or the identity, number and price of shares to be delivered by the Trust for the Fund

to the redeeming holder ("Redemption Securities"). The composition of the securities required to be tendered to the Fund for creation purposes and of the securities to be delivered on redemption will be disseminated each business day and will be applicable to requests for creations or redemption, as the case may be, on that day. This exemptive relief under Rule 10b-10 with respect to creations and redemption is subject to the following conditions:

- 1) Confirmations to customers engaging in creations or redemptions must state that all information required by Rule 10b-10 will be provided upon request;
- 2) Any such request by a customer for information required by Rule 10b-10 will be filed in a timely manner, in accordance with Rule 10b-10(c); and
- 3) Except for the identity, number, and price of shares of the component securities of the Deposit Securities and Redemption Securities, as described above, confirmations to customers must disclose all other information required by Rule 10b-10(a).

Rule 10b-17 (Untimely Announcement of Record Dates)

The SEC has granted an exemption from the requirements of Rule 10b-17 that will cover transactions in the Shares.

Section 11(d)(1); Rule 11d1-2 (Customer Margin)

The SEC has taken a no-action position under Section 11(d)(1) that will permit broker-dealers that do not create Shares but engage in both proprietary and customer transactions in such Shares exclusively in the secondary market to extend or maintain or arrange for the extension or maintenance of credit on the Shares, in connection with such secondary market transactions. For broker-dealers that engage in the creation of Shares, the SEC has also taken a no-action position under Rule 11d1-2 that will cover the extension or maintenance or the arrangement for the extension or maintenance of credit on the Shares that have been owned by the persons to whom credit is provided for more than 30 days.

Rule 14e-5

An exemption from Rule 14e-5 has been granted to permit any person acting as a dealer-manager of a tender offer for a component security of the Fund (1) to redeem Fund Shares in Creation Unit Aggregations from the issuer that may include a security subject to such tender offer and (2) to purchase Fund Shares during such tender offer. In addition, a no-action position has been taken under Rule 14e-5 if a broker-dealer acting as a dealer-manager of a tender offer for a security of the Fund purchases or arranges to purchase such securities in the secondary market for the purpose of tendering such securities to purchase one or more Creation Unit Aggregations of Shares, if made in conformance with the following:

- 1) such bids or purchases are effected in the ordinary course of business, in connection with a basket of 20 or more securities in which any security that is the subject of a distribution, or any reference security, does not comprise more than 5% of the value of the basket purchase; or
- 2) purchases are effected as adjustments to such basket in the ordinary course of business as a result of a change in the composition of the underlying index; and
- 3) such bids or purchases are not effected for the purpose of facilitating such tender offer.

SEC Rule 15c1-5 and 15c1-6 (Disclosure of Control and interest in Distributions)

The SEC has taken a no-action position under Rule 15c1-5 that will permit a broker-dealer to execute transactions in Shares without disclosing any control relationship with an issuer of a component security. In addition, the SEC has taken a no-action position under Rule 15c1-6 that will permit a broker dealer to execute transactions in the Shares without disclosing its participation or interest in a primary or secondary distribution of a component security.

This Information Circular is not a statutory prospectus. BATS Members should consult the prospectus for a security and the security's website for relevant information.
