CBOE EXECUTE SUCCESS℠

Regulatory Circular RG14-110

Date: July 10, 2014

To: Trading Permit Holders
From: Regulatory Services Division
RE: Reports of Execution of Stock Transactions Related to Tied to Stock Orders

---

Chicago Board Options Exchange, Incorporated (the "Exchange") filed proposed rule change SR-CBOE-2014-040 that, among other things and subject to regulatory approval, would require each Trading Permit Holder ("TPH") to, on the business day following the order execution date, report to the Exchange certain information regarding the executed stock or convertible security legs of QCC orders, stock-option orders and other tied to stock orders that the TPH executed on the Exchange that trading day.

Pursuant to proposed Rule 15.2A, the Exchange may determine the form and manner of the reports to be submitted. Pending regulatory approval of rule filing SR-CBOE-2014-040, the Exchange expects the manner and form of these reports to follow the data layout requirements set forth in the attachment to this Regulatory Circular. These requirements are a component of data layout requirements for other regulatory request data submissions. As a result, there are references in the layout not directly applicable to the tied to stock reporting requirement. (See the "Required for Tied to Stock Reporting" column for identification of the applicable fields). If the Exchange determines to update or change these data layout requirements, it will announce those updates or changes in another Regulatory Circular. The Exchange will announce the implementation date for this reporting requirement in a Regulatory Circular within 90 days following the approval of the rule filing referenced above.

Attachment to RG14-110

Proposed Data Layout Requirements for Reports of Stock Transactions Related to Tied to Stock Orders

(As of July 10, 2014)

I. File Requirements

The requirements for the file format, file naming convention, and field formats will be as follows:

- Files transferred to the Exchanges should be comma delimited
- All files should be in the compressed GZIP format
- All files should be pushed to the designated location for retrieval
- Data provided by the firms that reside at the designated location will only be accessible to Regulatory staff

Data examples included below are fictitious and do not reflect an actual firm or individual's information.

A. File Naming Convention

Along with standardizing the file formats, a standard naming convention will be used for identification from all TPHs when submitting the data. File names are to be supplied in lower case. Submissions are expected to be in a zipped CSV format. The naming convention is as follows:

<tph_name>.<clear_firm>.<data_file_type>.YYYYMMDD.csv.gz

tph_name -- >> TPH of data
clear_firm -- >> Clear firm code
data_file_type -- >> as defined in table above
YYYYMMDD -- >> Year Month and Day file is sent

B. Field Legend

Values that are not applicable/not required, are to be set to null and include the comma delimiter.

The following table describes standard formats for the specified fields:
