26-006 (BZX Opt Risk Controls) Exhibit

The self-regulatory organization may choose to attach as Exhibit 5 proposed changes to rule text in place of providing it in Item I and which may otherwise be more easily readable if provided separately from Form 19b-4. Exhibit 5 shall be considered part of the proposed rule change

Partial Amendment

Add Remove View

If the self-regulatory organization is amending only part of the text of a lengthy proposed rule change, it may, with the Commission's permission, file only those portions of the text of the proposed rule change in which changes are being made if the filing (i.e. partial amendment) is clearly understandable on its face. Such partial amendment shall be clearly identified and marked to show deletions and additions.

Item 1. Text of the Proposed Rule Change

(a) Cboe BZX Exchange, Inc. (the “Exchange” or “BZX”) proposes to amend Rule 21.16 with respect to its Risk Monitor Mechanism, to provide Members with additional flexibility in establishing how their trading activity counts towards certain risk parameters. The text of the proposed rule change is provided in Exhibit 5.

- (b) Not applicable.
- (c) Not applicable.

Item 2. Procedures of the Self-Regulatory Organization

(a) The Exchange’s President (or designee) pursuant to delegated authority approved the proposed rule change on January 7, 2026. The Exchange will announce via Exchange Notice the implementation date of the proposed rule change no later than 30 days after the operative date of this rule filing.

(b) Please refer questions and comments on the proposed rule change to Pat Sexton, Executive Vice President, General Counsel, and Corporate Secretary, (312) 786-7467, or Sarah Williams, (224) 461-6793, Cboe BZX Exchange, Inc., 433 West Van Buren Street, Chicago, Illinois 60607.

Item 3. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**(a) Purpose**

The Exchange proposes to amend Rule 21.16, Risk Monitor Mechanism. Specifically, the Exchange proposes changes to the Risk Monitor Mechanism to provide Members with additional flexibility in establishing how their trading activity counts towards certain risk parameters.

By way of background, the Risk Monitor Mechanism provides Members with the ability to manage their order and execution risk. Each Member may establish limits for various parameters in the Exchange's counting program. The System¹ counts each of the following within an underlying for an EFID² ("underlying limit") and across all underlyings for an EFID ("EFID limit") and/or for all underlyings for a group of EFIDs ("EFID Group") ("EFID Group limit"), over a Member-established time period ("interval") and on an absolute basis for a trading day ("absolute limits"): (i) number of contracts executed ("volume"); (ii) notional value of executions ("notional"); (iii) number of executions ("count"); (iv) number of contracts executed as a percentage of number of contracts outstanding within an Exchange-designated time period or during the trading day, as applicable ("percentage"), which the System determines by calculating the percentage of a Member's outstanding contracts that executed on each side of the market during the time period or trading day, as applicable, and then summing the series percentages on each side in the underlying; and (v) number of times the limits established by the parameters (i) through (iv) are reached ("risk trips") (collectively, "risk parameters"). Additionally, when the System determines a risk parameter exceeds a Member's underlying limit within the interval or the absolute limit for the class, the Risk Monitor Mechanism cancels or rejects such Member's orders or quotes in all series of the underlying and cancels or rejects any additional orders or quotes from the Member in the underlying until the counting program resets. Similarly, when the System determines a risk parameter exceeds a Member's EFID limit within the interval or the absolute limit for the EFID, the Risk Monitor Mechanism

¹ The term "System" means the automated trading system used by BZX Options for the trading of options contracts. See Rule 16.1.

² The term "EFID" means an Executing Firm ID. See Rule 21.1(k).

cancels or rejects such Member's orders or quotes in all underlyings and cancels or rejects any additional orders or quotes from the EFID in all underlyings until the counting program resets. Finally, when the System determines a risk parameter exceeds a Member's EFID Group limit within the interval or the absolute limit for the EFID Group, the Risk Monitor Mechanism cancels or rejects such Member's orders or quotes in all underlyings and cancels or rejects any additional orders or quotes from any EFID within the EFID Group in all underlyings until the counting program resets.

The Exchange proposes to amend Rule 21.16 to enhance the Risk Monitor Mechanism to provide Members with additional flexibility in establishing how their trading activity counts towards certain risk parameters.

First, the Exchange proposes to add new Rule 21.16(b)³ to allow Members the option to exclude certain options auction-executed volume from certain of the Risk Monitor Mechanism risk parameters, namely the volume parameter in Rule 21.16(a)(i) and the count parameter in Rule 21.16(a)(iii). Under the proposed change, a Member may specify whether volume or executions in Complex Order Auctions ("COA") count toward the Member's class, EFID, or EFID Group limit (on both an interval or absolute basis).

The Exchange also proposes to add new Rule 21.16(b)(ii) to allow Members the option to establish the volume or count parameters on a contra-party capacity basis. Under the proposed change, a Member may specify a percentage (up to 100%) of volume or executions to count toward the Member's class, EFID, or EFID Group limit based on contra-party capacity (on both an interval or absolute basis). For example, under the

³ As part of the proposed change, the Exchange proposes to renumber current Rules 21.16(b), (c), (d), (e), and (f) as Rules 21.16(c) (d), (e), (f), and (g), respectively.

proposed rule change, a Member could specify that only 20% of the quantity on each trade with a Capacity “C” (i.e., Public Customer)⁴ contra-party would be counted towards the Member’s class, EFID, or EFID Group limit (on an interval or absolute basis).

The proposed changes allow the Member to more precisely tailor the volume and count parameters within the Risk Monitor Mechanism. The Exchange notes that use of the proposed enhancements is optional, and Members are free to utilize them or not, at their discretion.

(b) Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁵

Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁶ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with

⁴ See Rule 16.1 (definition of “Capacity”).

⁵ 15 U.S.C. 78f(b).

⁶ 15 U.S.C. 78f(b)(5).

the Section 6(b)(5)⁷ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes the proposed change would remove impediments to and perfect the mechanism of a free and open market and a national market system, and protect investors and the public interest by providing Members with enhanced abilities to manage their risk with respect to orders on the Exchange. The Exchange believes that allowing Members to tailor volume and count parameters promotes risk management processes that better reflect the risks of different types of trading activity. The Exchange believes that the proposed rule change will protect investors and the public interest because the proposed enhancements will assist Members in minimizing their risk exposure, thereby reducing the potential for disruptive, market-wide events.

The Exchange believes the proposed change to allow Members to specify whether volume or executions in COA count toward the Member's underlying, EFID, or EFID Group limit (on both an interval or absolute basis) is reasonable because orders executed through these auction mechanisms are subject to different protections (i.e., price improvement requirements and exposure periods) as compared to other order types. As a result, these orders have different risk considerations. Allowing Members to differentiate between these execution types in their Risk Monitor Mechanism settings enables them to establish risk parameters that more accurately reflect their risk management tolerances. The Exchange again notes that this functionality is optional, and Members may continue

⁷

Id.

to include executions resulting from these exchange auctions in their risk parameters (as is the case today) if they prefer.

The Exchange also believes its proposal to allow Members to establish volume or count parameters on a contra-party capacity basis is reasonable, as different contra-party types present different risk profiles. For example, this enhancement may be beneficial for Market-Makers or other liquidity providers who may wish to establish lower limits for when providing liquidity to Customer orders while establishing stricter parameters for trades against other institutional contra-parties which may involve different risk considerations. The Exchange believes allowing Members the option to adjust their risk tolerance based on contra-party capacity provides the opportunity for a more precise risk management approach.

Finally, the Exchange believes the proposed changes are not unfairly discriminatory, as the proposed enhancements are available to all Members and apply uniformly to all Members who may choose to utilize the enhanced risk parameter settings. As noted above, use of the proposed enhancements is optional and Members are free to utilize them or not, at their discretion.

Item 4. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act, because the proposed enhancements are available to all Members and apply uniformly to all Members who may choose to utilize the enhanced risk

parameter settings. As noted above, use of the proposed enhancements is optional and Members are free to utilize them or not, at their discretion.

Additionally, the Exchange does not believe that the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed enhancements apply only to trading on the Exchange. Again, the Exchange notes that it is voluntary for the Members to determine whether to make use of the new enhancements of the Risk Monitor Mechanism. To the extent that the proposed changes may make the Exchange a more attractive trading venue for market participants on other exchanges, such market participants may elect to become Exchange market participants.

Item 5. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

Item 6. Extension of Time Period for Commission Action

Not applicable.

Item 7. Basis for Summary Effectiveness Pursuant to Section 19(b)(3) or for Accelerated Effectiveness Pursuant to Section 19(b)(2) or Section 19(b)(7)(D)

(a) The proposed rule change is filed for immediate effectiveness pursuant to Section 19(b)(3)(A) of Act⁸ and Rule 19b-4(f)(6)⁹ thereunder.

⁸ 15 U.S.C. 78s(b)(3)(A).

⁹ 17 CFR 240.19b-4(f)(6).

(b) The Exchange designates that the proposed rule change effects a change that (i) does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; and (iii) by its terms, does not become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest. Additionally, the Exchange has given the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission.

The Exchange believes the proposed rule change will not significantly affect the protection of investors or the public interest. As noted above, the proposed change is designed to provide Members with enhanced abilities to manage their risk with respect to orders on the Exchange. The Exchange believes that allowing Members to tailor volume and count parameters promotes risk management processes that better reflect the risks of different types of trading activity. The Exchange believes that the proposed rule change will protect investors and the public interest because the proposed enhancements will assist Members in minimizing their risk exposure, thereby reducing the potential for disruptive, market-wide events.

As noted above, orders executed through COA are subject to different protections (i.e., price improvement requirements and exposure periods) as compared to other order types. As a result, these orders have different risk considerations. Allowing Members to differentiate between these execution types in their Risk Monitor Mechanism settings

enables them to establish risk parameters that more accurately reflect their risk management tolerances, to the benefit of investors and the public interest.

Also, as noted above in regards to its proposal to allow Members to establish volume or count parameters on a contra-party capacity basis, different contra-party types present different risk profiles. For example, this enhancement may be beneficial for Market-Makers or other liquidity providers who may wish to establish lower limits for when providing liquidity to Customer orders while establishing stricter parameters for trades against other institutional contra-parties which may involve different risk considerations. The Exchange believes allowing Members the option to adjust their risk tolerance based on contra-party capacity provides the opportunity for a more precise risk management approach, to the benefit of investors and the public interest.

Finally, the Exchange believes the proposed changes are not unfairly discriminatory, as the proposed enhancements are available to all Members and apply uniformly to all Members who may choose to utilize the enhanced risk parameter settings. As noted above, use of the proposed enhancements is optional and Members are free to utilize them or not, at their discretion. Members who elect to not use these enhancements will simply continue to have the Risk Monitor Mechanism apply the volume and count limits as it does today.

As noted above, the Exchange believes the proposed rule change does not impose any significant burden on competition, because the proposed enhancements are available to all Members and apply uniformly to all Members who may choose to utilize the enhanced risk parameter settings. As noted above, use of the proposed enhancements is optional and Members are free to utilize them or not, at their discretion. Further, the

proposed enhancements apply only to trading on the Exchange. To the extent that the proposed changes may make the Exchange a more attractive trading venue for market participants on other exchanges, such market participants may elect to become Exchange market participants.

For the foregoing reasons, this rule filing qualifies as a “non-controversial” rule change under Rule 19b-4(f)(6), which renders the proposed rule change effective upon filing with the Commission. At any time within 60 days of the filing of this proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

(c) Not applicable.

(d) Not applicable.

Item 8. Proposed Rule Change Based on Rules of Another Self-Regulatory Organization or of the Commission

The proposed rule change is not based on a rule either of another self-regulatory organization or of the Commission.

EXHIBIT 1**SECURITIES AND EXCHANGE COMMISSION**

[Release No. 34- ; File No. SR-CboeBZX-2026-006]

[Insert date]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend Rule 21.16 with Respect to its Risk Monitor Mechanism, to Provide Members with Additional Flexibility in Establishing how their Trading Activity Counts Towards Certain Risk Parameters

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on [insert date], Cboe BZX Exchange, Inc. (the “Exchange” or “BZX”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a “non-controversial” proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act³ and Rule 19b-4(f)(6) thereunder.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the “Exchange” or “BZX”) proposes to amend Rule 21.16 with respect to its Risk Monitor Mechanism, to provide Members with additional flexibility in establishing how their trading activity counts towards certain risk parameters. The text of the proposed rule change is provided in Exhibit 5.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ 15 U.S.C. 78s(b)(3)(A)(iii).

⁴ 17 CFR 240.19b-4(f)(6).

The text of the proposed rule change is also available on the Commission's website (<https://www.sec.gov/rules/sro.shtml>), the Exchange's website (https://www.cboe.com/us/equities/regulation/rule_filings/bzx/), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 21.16, Risk Monitor Mechanism. Specifically, the Exchange proposes changes to the Risk Monitor Mechanism to provide Members with additional flexibility in establishing how their trading activity counts towards certain risk parameters.

By way of background, the Risk Monitor Mechanism provides Members with the ability to manage their order and execution risk. Each Member may establish limits for various parameters in the Exchange's counting program. The System⁵ counts each of the following within an underlying for an EFID⁶ ("underlying limit") and across all underlyings

⁵ The term "System" means the automated trading system used by BZX Options for the trading of options contracts. See Rule 16.1.

⁶ The term "EFID" means an Executing Firm ID. See Rule 21.1(k).

for an EFID (“EFID limit”) and/or for all underlyings for a group of EFIDs (“EFID Group”) (“EFID Group limit”), over a Member-established time period (“interval”) and on an absolute basis for a trading day (“absolute limits”): (i) number of contracts executed (“volume”); (ii) notional value of executions (“notional”); (iii) number of executions (“count”); (iv) number of contracts executed as a percentage of number of contracts outstanding within an Exchange-designated time period or during the trading day, as applicable (“percentage”), which the System determines by calculating the percentage of a Member’s outstanding contracts that executed on each side of the market during the time period or trading day, as applicable, and then summing the series percentages on each side in the underlying; and (v) number of times the limits established by the parameters (i) through (iv) are reached (“risk trips”) (collectively, “risk parameters”). Additionally, when the System determines a risk parameter exceeds a Member’s underlying limit within the interval or the absolute limit for the class, the Risk Monitor Mechanism cancels or rejects such Member’s orders or quotes in all series of the underlying and cancels or rejects any additional orders or quotes from the Member in the underlying until the counting program resets. Similarly, when the System determines a risk parameter exceeds a Member’s EFID limit within the interval or the absolute limit for the EFID, the Risk Monitor Mechanism cancels or rejects such Member’s orders or quotes in all underlyings and cancels or rejects any additional orders or quotes from the EFID in all underlyings until the counting program resets. Finally, when the System determines a risk parameter exceeds a Member’s EFID Group limit within the interval or the absolute limit for the EFID Group, the Risk Monitor Mechanism cancels or rejects such Member’s orders or quotes in all underlyings and cancels

or rejects any additional orders or quotes from any EFID within the EFID Group in all underlyings until the counting program resets.

The Exchange proposes to amend Rule 21.16 to enhance the Risk Monitor Mechanism to provide Members with additional flexibility in establishing how their trading activity counts towards certain risk parameters.

First, the Exchange proposes to add new Rule 21.16(b)⁷ to allow Members the option to exclude certain options auction-executed volume from certain of the Risk Monitor Mechanism risk parameters, namely the volume parameter in Rule 21.16(a)(i) and the count parameter in Rule 21.16(a)(iii). Under the proposed change, a Member may specify whether volume or executions in Complex Order Auctions (“COA”) count toward the Member’s class, EFID, or EFID Group limit (on both an interval or absolute basis).

The Exchange also proposes to add new Rule 21.16(b)(ii) to allow Members the option to establish the volume or count parameters on a contra-party capacity basis. Under the proposed change, a Member may specify a percentage (up to 100%) of volume or executions to count toward the Member’s class, EFID, or EFID Group limit based on contra-party capacity (on both an interval or absolute basis). For example, under the proposed rule change, a Member could specify that only 20% of the quantity on each trade with a Capacity “C” (i.e., Public Customer)⁸ contra-party would be counted towards the Member’s class, EFID, or EFID Group limit (on an interval or absolute basis).

⁷ As part of the proposed change, the Exchange proposes to renumber current Rules 21.16(b), (c), (d), (e), and (f) as Rules 21.16(c) (d), (e), (f), and (g), respectively.

⁸ See Rule 16.1 (definition of “Capacity”).

The proposed changes allow the Member to more precisely tailor the volume and count parameters within the Risk Monitor Mechanism. The Exchange notes that use of the proposed enhancements is optional, and Members are free to utilize them or not, at their discretion.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁹ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹⁰ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹¹ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes the proposed change would remove impediments to and perfect the mechanism of a free and open market and a national

⁹ 15 U.S.C. 78f(b).

¹⁰ 15 U.S.C. 78f(b)(5).

¹¹ Id.

market system, and protect investors and the public interest by providing Members with enhanced abilities to manage their risk with respect to orders on the Exchange. The Exchange believes that allowing Members to tailor volume and count parameters promotes risk management processes that better reflect the risks of different types of trading activity. The Exchange believes that the proposed rule change will protect investors and the public interest because the proposed enhancements will assist Members in minimizing their risk exposure, thereby reducing the potential for disruptive, market-wide events.

The Exchange believes the proposed change to allow Members to specify whether volume or executions in COA count toward the Member's underlying, EFID, or EFID Group limit (on both an interval or absolute basis) is reasonable because orders executed through these auction mechanisms are subject to different protections (i.e., price improvement requirements and exposure periods) as compared to other order types. As a result, these orders have different risk considerations. Allowing Members to differentiate between these execution types in their Risk Monitor Mechanism settings enables them to establish risk parameters that more accurately reflect their risk management tolerances. The Exchange again notes that this functionality is optional, and Members may continue to include executions resulting from these exchange auctions in their risk parameters (as is the case today) if they prefer.

The Exchange also believes its proposal to allow Members to establish volume or count parameters on a contra-party capacity basis is reasonable, as different contra-party types present different risk profiles. For example, this enhancement may be beneficial for Market-Makers or other liquidity providers who may wish to establish lower limits for

when providing liquidity to Customer orders while establishing stricter parameters for trades against other institutional contra-parties which may involve different risk considerations. The Exchange believes allowing Members the option to adjust their risk tolerance based on contra-party capacity provides the opportunity for a more precise risk management approach.

Finally, the Exchange believes the proposed changes are not unfairly discriminatory, as the proposed enhancements are available to all Members and apply uniformly to all Members who may choose to utilize the enhanced risk parameter settings. As noted above, use of the proposed enhancements is optional and Members are free to utilize them or not, at their discretion.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act, because the proposed enhancements are available to all Members and apply uniformly to all Members who may choose to utilize the enhanced risk parameter settings. As noted above, use of the proposed enhancements is optional and Members are free to utilize them or not, at their discretion.

Additionally, the Exchange does not believe that the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed enhancements apply only to trading on the Exchange. Again, the Exchange notes that it is voluntary for the Members

to determine whether to make use of the new enhancements of the Risk Monitor Mechanism. To the extent that the proposed changes may make the Exchange a more attractive trading venue for market participants on other exchanges, such market participants may elect to become Exchange market participants.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

- A. significantly affect the protection of investors or the public interest;
- B. impose any significant burden on competition; and
- C. become operative for 30 days from the date on which it was filed, or such

shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act¹² and Rule 19b-4(f)(6)¹³ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

¹² 15 U.S.C. 78s(b)(3)(A).

¹³ 17 CFR 240.19b-4(f)(6).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments:

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBZX-2026-006 on the subject line.

Paper Comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeBZX-2026-006. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeBZX-2026-006 and should be submitted

on or before [INSERT DATE 21 DAYS AFTER DATE OF PUBLICATION IN THE

FEDERAL REGISTER].

For the Commission, by the Division of Trading and Markets, pursuant to
delegated authority.¹⁴

Sherry R. Haywood,

Assistant Secretary.

Rule 21.16. Risk Monitor Mechanism

(a) Each Member may establish limits for the following parameters in the Exchange's counting program. The System counts each of the following within an underlying for an EFID ("underlying limit"), across all underlyings for an EFID ("EFID limit"), and/or across all underlyings for a group of EFIDs ("EFID Group") ("EFID Group limit"), over a Member-established time period ("interval") and on an absolute basis for a trading day ("absolute limits"):

- (i) number of contracts executed ("volume");
- (ii) notional value of executions ("notional");
- (iii) number of executions ("count");
- (iv) number of contracts executed as a percentage of number of contracts outstanding within an Exchange-designated time period or during the trading day, as applicable ("percentage"), which the System determines by calculating the percentage of a Member's outstanding contracts that executed on each side of the market during the time period or trading day, as applicable, and then summing the series percentages on each side in the underlying; and
- (v) number of times the limits established by the parameters under (a)(i)-(iv) above are reached ("risk trips").

(b) For volume and count limits established under subparagraph (a)(i) and (iii), a Member may:

- (i) specify whether volume or executions in COAs count toward the Member's underlying, EFID, or EFID Group limit (on both an interval or absolute basis); or
- (ii) specify a percentage (up to 100%) of volume or executions to count toward the Member's underlying, EFID, or EFID Group limit based on contra-party capacity (on both an interval or absolute basis).

([b]c) When the System determines that the volume, notional, count, percentage, or risk trips limits have been reached:

* * * * *

([c]d) The System will execute any marketable orders or quotes that are executable against a Member's order or quote and received prior to the time the Risk Monitor Mechanism is triggered at the price up to the size of the Member's order or quote, even if such execution results in executions in excess of the Member's parameters.

([d]e) *Counting Program Reset.*

* * * * *

([e]f) A Member may also engage the Risk Monitor Mechanism to cancel resting bids and offers, as well as subsequent orders as set forth in Rule 22.11.

([f]g) *Complex Orders.* The System counts individual trades executed as part of a complex order (or COA response) when determining whether the volume, notional, count, or risk trips limit has been reached. The System counts the percentage executed of a complex order (or COA response) when determining whether the percentage limit has been reached.
