

## CFE 10G Customer Switch Migration Underway

Cboe Futures Exchange (CFE) is migrating all 10G customer connections to new switch hardware during weekend maintenance windows. The Cboe NOC team will send notices to impacted customers specifying the connections affected on each date prior to each implementation. The migration is expected to be complete on **Friday, December 11**. See the [Tradedesk Update](#).

## Cboe Options to Expand Drill Through Protections

On **Monday, November 16** for Cboe EDGX Options Exchange, and **Tuesday, November 17** for Cboe BZX, Cboe and C2 Options Exchanges, drill through protections were expanded for all single leg orders and for complex orders that do not specify a drill through override. See the [Tradedesk Update](#).

## Cboe Silexx Enhancements

Cboe Silexx, a world-class order execution management system (OEMS), recently released a number of enhancements to order tickets, order manager/history and the Trade Confirms module. See the [Tradedesk Update](#).

## Adjustment of Closing Time for Proprietary Index and Certain Exchange Traded Products

Effective this **Monday, November 23**, Cboe Options Exchange will adjust the daily closing time for the S&P 500 ESG Index (SPESG) options, MSCI EAFE Index (MXEA) options and MSCI Emerging Markets Index (MXEF) options from 4:15 p.m. ET to 4:00 p.m. ET, or 1:00 p.m. ET on early market close days. See the [Tradedesk Update](#).

## Trading Schedule for Thanksgiving Holiday

Cboe [U.S. Equities and Options Exchanges](#) will be closed on **Thursday, November 26**, and will close early on **Friday, November 27**, in observance of Thanksgiving. Normal trading hours will resume on **Monday, November 30**. CFE trading hours for the holiday can be found [here](#).

## Cboe Closing Cross Launch in DXE

Effective **Friday, November 27**, Cboe Europe will launch Cboe Closing Cross (3C) on the DXE Order Book (Cboe NL). Testing is currently available in the DXE certification environment. See the [Tradedesk Update](#).

## Cboe Proprietary Index Products MXEA and MXEF to be Added to 3:00 p.m. Marking Prices Files

On **Monday, November 30**, Cboe Options Exchange will add data for MSCI EAFE Index (MXEA) options and MSCI Emerging Markets Index (MXEF) options to the marking price files. Testing is currently available in the daily and monthly marking prices test files. See the [Tradedesk Update](#).

## Cboe Options Exchange FLEX Delta Adjusted at Close Order Type Release Date

Effective **Wednesday, December 2**, Cboe Options Exchange will introduce a new order type, FLEX Delta-Adjusted at Close (DAC), which will be accepted during the Regular Trading Hours session. Both simple and complex FLEX DAC orders will be supported. The maximum number of legs allowed on a FLEX DAC order is 99. Testing is currently available in the Cboe Options certification environment. See the [Tradedesk Update](#).

## Cboe EDGX Exchange to Begin Trading at 4 a.m. ET

Effective **Monday, December 7**, Cboe EDGX Equities Exchange (EDGX) will begin accepting orders at 3:30 a.m. ET and will commence the early trading session at 4:00 a.m. ET, pending regulatory review. Testing is currently available in the EDGX certification environment. See the [Tradedesk Update](#).

## Cboe LIS Symbol Reference Data File Deprecation

On **Friday, December 11**, the Cboe LIS Symbol Reference Data File will be removed. Public, private connection, back up and certification URLs for the LIS Symbol Reference Data File and the LIS Tick File described in the Reference Data Specification will no longer be accessible from the date above. See the [Tradedesk Update](#).

We encourage your input on these and other exchange matters. Please feel free to contact us.
