

Cboe Reopens Chicago Trading Floor

On **Monday, June 15**, the Cboe Options Exchange trading floor in Chicago successfully resumed hybrid trading – which includes open-outcry and electronic trading mechanisms. The trading floor reopened with a modified floor layout, with **stringent health and safety protocols** in place for the well-being of the trading floor community, which includes Cboe associates and trading permit holders (TPHs). All individuals on the Cboe trading floor are also required to comply with new standards of conduct related to COVID-19.

While Cboe's Chicago trading floor in the 400 S. LaSalle Street building has reopened, the Cboe office in Chicago, along with the company's other locations across the globe, remain closed. All Cboe staff, with the exception of a limited number of essential personnel, continue to work remotely. Cboe is closely monitoring developments around COVID-19 and guidance provided by governmental and public health agencies. See the [press release](#).

Trading Floor Disinfecting and Deep Cleaning

As a reminder, disinfecting and deep cleaning of the trading floor will occur on a daily basis. TPHs should take home, or place in storage containers, all personal items (e.g. paperwork, water bottles and etc.) at the end of each business day to avoid damage to these items. See the [Tradedesk Update](#).

Trading Floor Lottery for Vacant SPX Spot

To comply with local and state health and safety guidelines, Cboe determined where floor participants will stand in the trading crowds while operating in a modified manner. See the [Tradedesk Update](#) for details on today's, **Friday, June 19**, lottery for the use of one SPX Market-Maker trading space.

Cboe LiveVol Pro - One Month No Platform Fees

Cboe LiveVol provides aggregated derivative market statistics, trade review and theoretical price functionality for obvious error analysis, trade tape, volatility analytics, scans and visualizations delivered in both a desktop platform and APIs. The web-based platform provides a quick way to analyze trading activity and identify opportunities. For one month, LiveVol Pro is waiving platform fees. For more information, click [here](#).

Penny Interval Program Listing Requirements

On **Wednesday, July 1**, Cboe Options Exchanges will implement new Penny Interval Program listing requirements. See the [Tradedesk Update](#).

Cboe Options BOE Quoting Interface Update

On **Friday, July 10**, BZX, C1, C2 and EDGX Options Exchanges will restrict usage of the BOE Quoting Interface to Market Makers only. In addition, quotes with zero value SendTime will be rejected. See the [Tradedesk Update](#).

Cboe One Feed Enhancement

Effective **Friday, July 10**, Cboe will be enhancing the Cboe One Summary and Premium Feeds to include the primary listing market's official opening and closing price, subject to regulatory review. The Cboe One Feed is a data feed that disseminates, on a real-time basis, the aggregate best bid and offer (BBO) of all displayed orders for securities traded on the Cboe Equities Exchanges. See the [Tradedesk Update](#).

Cboe Options Adds Cancel/Reject Subreason Field and Risk Reset Enhancement

On **Monday, August 3**, for EDGX Options Exchange, and on **Tuesday, August 4**, for BZX, Cboe (C1) and C2 Options Exchanges reject and cancel messages following a mass cancel event will distinguish between whether the mass cancel was initiated by the Exchange or by the user. See the [Tradedesk Update](#).

Cboe Disaster Recovery Data Center Migration

Please be advised that the relocation of the Disaster Recovery (DR) environments to 350 Cermak (Chicago) for both C2 Options Exchange and CFE have been rescheduled to take place in August 2020 and September 2020 respectively. These migrations are taking place in preparation for Cboe's move out of 400 S. LaSalle in Chicago. See the [Tradedesk Update](#).

We encourage your input on these and other exchange matters. Please feel free to contact us.
