Visit the Cboe Trading Floor During Open House Chicago
This Saturday, **October 14** from 10 a.m. to 5 p.m., the Cboe trading floor will participate once again this year in **Open House Chicago**, a free, educational program sponsored by the Chicago Architecture Center. From the 8th floor mezzanine, visitors will take in the expansive trading floor, try on trading jackets and learn more about the world of options trading. This is a great opportunity to show off the floor to friends and family.

**Cboe Options to Allow Simultaneous Auctions for AIM/C-AIM Orders of All Sizes**
Effective **November 1** on Cboe EDGX Options Exchange and **November 6** on Cboe Options Exchange, simultaneous Automated Improvement Mechanism (AIM) and Complex AIM (C-AIM) auctions for AIM/C-AIM orders of all sizes will be allowed. See the **Tradedesk Update** for more information.

**Index Insights from September**
A new post on Cboe Insights recaps some September highlights from Cboe's index options complex, including year-to-date gains for VXD, VPN and BXN, along with the launch of the new Cboe S&P 500 Dispersion Index (DSPX), and looks ahead to October, which over the past 30 years, has had the highest average high values (29.0) for the VIX Index. Read more at Cboe Insights.

**Cboe C2 Options Exchange Scheduled Matching Engine Hardware Upgrade**
Starting today, Friday, **October 13** through Friday, **October 20**, Cboe C2 Options Exchange will perform a phased migration of Matching Engine processes to newer hardware. Once completed, this upgrade is expected to provide improved performance for all C2 members. See the **Tradedesk Update** for more information.

**Reminder: 2023 SIFMA/FIA/Reg SCI BCP/DR Test is Tomorrow**
As part of the annual SIFMA/FIA industry test, Cboe is scheduled to host its annual business continuity plan/disaster recovery (BCP/DR) test tomorrow, Saturday, **October 14**. The following U.S.-based Cboe equities, options and futures platforms will be participating in this industry-wide event: BYX Exchange, BZX Exchange, EDGA Exchange, EDGX Exchange, BZX Options Exchange, Cboe Options Exchange, C2 Options Exchange, EDGX Options Exchange and Cboe Futures Exchange. See the **Tradedesk Update** for more information.

**Cboe Equities Introduces MPID Filter on Purge Port**
Effective last Friday, **October 6**, all Cboe-affiliated U.S. Equities Exchanges have enabled a new “MPID Filter for Purge Ports” port attribute on FIX and BOE Purge sessions. Members may contact the Trade Desk to configure up to ten allowed MPIDs per purge port. See the **Tradedesk Notice** for additional information.

**Reminder - Cboe Options Updates to Time Priority Behavior Following Order/Quote Modifications**
Effective **October 25** on C2 Options Exchange and effective **October 30** on BZX Options, Cboe Options and EDGX Options Exchanges, Cboe will implement changes relating to the priority treatment of no-change quotes, the treatment of requests to cancel nonexistent quotes and the priority treatment of order and quote modifications. See the **Tradedesk Update** for more information.
Cboe Equities and Options Switch Replacements
Cboe will perform switch hardware upgrades in the BYX Equities, BZX Equities, EDGA Equities, EDGX Equities, BZX Options, C2 Options and EDGX Options Exchange environments. See the Tradedesk Update for the deployment schedule, which begins on November 3, after close of business.

CFE Announces Enhancements to Block/ECRP Trade Reporting Tool Relating to Derived Block Trades
Effective December 11, Cboe Futures Exchange plans to allow for the reporting of Derived Block Trades in corporate bond index futures and to introduce a related supporting enhancement to the Block/ECRP Reporting Tool in the Cboe Customer Web Portal, subject to regulatory review. See the Tradedesk Update for more information.

Cboe Equities Introduces Multiple Access Identifier Match Trade Prevention for Sponsored Participants
Effective immediately, all Cboe-affiliated U.S. equities exchanges will support multiple access identifier Match Trade Prevention (MTP) for users who submit orders both directly to the exchange and as a sponsored participant through a sponsoring member. See the Tradedesk Update for more information.

2023 Mandatory Weekend Virtual Trading Floor (VTF) Production Testing for Cboe Options Floor TPHs
Cboe Options Exchange plans to conduct mandatory Virtual Trading Floor (VTF) production testing on Saturday, November 11, from 7:30 a.m. to 12:00 p.m. CT for Floor Trading Permit Holders (TPHs) in the SPX, VIX, RUT and Multi-List trading crowds. Participating TPHs must do so from their off-site locations and not from the Cboe Trading Floor. See the Tradedesk Update for more information.

Cboe Equities Exchanges Introduce Disallow Market Orders Port Attribute
Today, all Cboe-affiliated U.S. equities exchanges introduced a new “Disallow Market Orders” port attribute on FIX and BOE protocols. This new port attribute will allow members to control the acceptance or rejection of inbound market orders during continuous trading. An associated new Port Control will also be available for members within the Cboe Customer Web Portal. See the Tradedesk Update for more information.

Cboe Europe Derivatives Announces Maximum Composite and Opening Collar Width Changes for Options
Cboe Europe Derivatives has implemented updates to the Options Maximum Composite Widths and Opening Collar Widths. See the Tradedesk Update for more information.

Cboe Europe Annual Disaster Recovery Test
On November 25, Cboe Europe will be conducting its annual disaster recovery test for the Production BXE, CXE, DXE, TRF, SIS (Equities) and CEDX (Derivatives) environments. See the Tradedesk Update for more information.
